MILITARYATV.COM TO PROVIDE SUPPORT FOR SHOT SHOW 2014

FOR IMMEDIATE RELEASE: 29 December 2013

Decatur, IL, 29 December 2013 - MilitaryAtv.com has entered into an agreement to provide support vehicles for the 2014 SHOT Show® Industry Days at the Range™ to be held in Boulder City, NV just prior to and during the first day of SHOT Show® 2014. Support will include providing support vehicles to setup and tear down the range; as well as transport weapons and ammunition to the firing line during demonstrations.

Vehicles will be utilized during the "Media Day at the Range™" held on the Monday prior to SHOT Show®; as well as the brand new "Buyer Day at the Range™" in which 700 invited distributors, dealers and retailers will be given the opportunity to learn about new products.

In addition to support vehicles, MilitaryAtv.com will have a display tent with the RP Advanced Mobile Systems conversions based on the commercially available Can-Am Commander and all new Commander MAX platforms. Popular conversions include the RP Strike Package, and newly developed Police Package designed to allow Police additional speed in reaching remote sites such as city parks with limited roads and access, desert or wooded environments with rough terrain, as well as urban areas where the main roads might be blocked or restricted.

Company Personnel and Military Veterans will be on hand to answer questions concerning the vehicle's capabilities and availability to military personnel, municipalities and consumers alike.
