CHINA CARBON BLACK  
ASSESSMENT, OPPORTUNITIES & FORECAST UPTO 2018

### Chinese Carbon Black Market Will Record Close To US\$ 7 Billion In Annualized Sales by 2018 Projects Tech Archival

Carbon black is well renowned as world's best reinforcing material for rubber related products which also finds application as a key raw material in various chemical industries including inks, paints, batteries, etc. The global tire industry consumes nearly 80 % of the total carbon black demand. At present, nearly ten million tons of carbon black is consumed worldwide annually.

has resulted in shift of global carbon black manufacturing capacities towards Asia, fuelling the growth of new manufacturing capacities especially in China and India. It is expected that by 2015, nearly 65% of the global carbon black demand will come from Asia only which will further strengthen region's position as the largest producer and consumer of carbon black.

black by 2013. With an abundance of resources, significant foreign investment, and a favourable business climate, China has rapidly transformed itself into world's fastest-growing economy. Benefitting from this positive environment in the country, a large number of players entered into carbon black manufacturing and have been successful in operating scale economies which allows them to offer large quantities of low priced carbon black.

Tech Archival analysts have explored that most of the carbon black manufacturing units in western world especially in North America and Europe are being forced to shut down their operations because of the heavy competition they are facing from low cost Asian manufacturers. This

Benefitting from this global shift, the Chinese carbon black market recorded total sales volumes of more than 3 million tons and generated nearly US\$ 5 billion in revenues in 2013. Likewise, the total domestic production volumes and export volumes grew incessantly, continuing China's presence as the world's largest producer and net exporter of carbon

Since Chinese manufacturers are receiving good profit margins, it is also driving the market growth to reach higher levels. Tech Archival estimates that performance of the Chinese carbon black market will continue growing steadily right through 2018, reaching annualized revenues close to US\$ 7 billion in 2018.

### WHY YOU SHOULD BUY THIS REPORT

✓ Stay one step ahead with the best quality & timely information up-to previous year end (Dec, 2013) published in 2014.

✓ Save your precious time as you can discover complete insights including market value, market volume, market share, CAGR, market dynamics, trends & developments, threats & opportunities, competitive landscape, economic

and company profiles and more, all aggregated & explored in one document.

✓ Find out exclusive historic and forecast statistics from 2008 to 2018 clearly presented in a long list of charts, graphs and tables that helps you draw conclusions with ease.

✓ Take prints for your employees or include report content as reference in presentations, reports, marketing mix and many more.

In addition, you can also keep the report in your tablet or smartphone so that you can access it from anywhere.

## TABLE OF CONTENTS

- 1. Executive Summary**
- 2. World Carbon Black Market Overview & Forecast**
  - 2.1. Market Value & Forecast
  - 2.2. Market Volume & Forecast
  - 2.3. Market Segmentation & Forecast
- 3. China Carbon Black Market Overview & Forecast**
  - 3.1. Market Value & Forecast
  - 3.2. Market Volume & Forecast
  - 3.3. Market Share & Forecast
  - 3.4. Market Segmentation & Forecast
    - 3.4.1. By Region
    - 3.4.2. By Industrial Users
  - 3.5. Market Demand & Forecast
- 4. China Carbon Black Industry Overview & Forecast**
  - 4.1. Installed Capacity & Forecast
  - 4.2. Annualized Production & Forecast
  - 4.3. Utilization Levels & Forecast
  - 4.4. Supply Demand Analysis & Forecast
- 5. China Carbon Black Trade Overview & Forecast**
  - 5.1. Import Volume & Forecast
  - 5.2. Export Volume & Forecast
- 6. China Carbon Black Market Dynamics**
  - 6.1. Key Growth Drivers, Trends & Developments
  - 6.2. Pricing Analysis
  - 6.3. Key Challenges & Threats
- 7. China Carbon Black Industry PEST Analysis**
  - 7.1. Political Analysis
  - 7.2. Economic Analysis
  - 7.3. Social Analysis
  - 7.4. Technological Analysis
- 8. China Carbon Black Competitive Landscape**
  - 8.1. Buyer's Power
  - 8.2. Supplier's Power
  - 8.3. Threat of New Entrants
  - 8.4. Degree of Rivalry
  - 8.5. Threat of Substitutes
- 9. Company Profiles**
  - 9.1. Jiangxi Black Cat Carbon Black Co. Ltd.
  - 9.2. Cabot (China) Ltd.
  - 9.3. LongXing Chemical Stock Co. Ltd.
  - 9.4. Suzhou Baohua Carbon Black Co. Ltd.
  - 9.5. Shandong Huadong Rubber Material Co. Ltd.
  - 9.6. China Synthetic Rubber Corporation
  - 9.7. Liaoning Birla Carbon Co. Ltd.
  - 9.8. Shanxi Heima Carbon Black Co. Ltd.
- 10. China Economic Outlook & Forecast**
  - 10.1. GDP in China
    - 10.1.1. GDP by Nominal Per Capita
    - 10.1.2. GDP by PPP Per Capita
    - 10.1.3. GDP by Sector Composition
  - 10.2. Inflation in China
  - 10.3. Population in China
  - 10.4. Unemployment in China
  - 10.5. Currency Exchange Rates in China

For any additional questions, contact our orders team at [orders@techarchival.com](mailto:orders@techarchival.com).

## WHO WE ARE

Tech Archival is a global market and industry intelligence company engaged in the business of publishing premium research studies and offering bespoke research solutions. Our obsession for quality and precision combined with our advanced research expertise and focused approach helps us to cultivate superior insights for our global clients faster and more cost-effectively that help reach their strategic and operational objectives.

## OUR APPROACH TO RESEARCH

Every day at Tech Archival, we give serious focus to maintain research ethics and integrity for research excellence. Our analytics & research centres are fully equipped to conduct world class market/industry research studies and offer custom research solutions. We aim to bring quality, precision and authenticity in every solution we offer.

To achieve these goals, we have specialized Data Development Team, Analyst Team and Editorial Team, all joining their efforts to deliver premium research solutions. Our experienced researchers in Data Development Team possess strong primary & secondary research skills and use proprietary frameworks for collecting data through extensive interviews, surveys and other wide-ranging secondary research techniques.

The information thus garnered is forwarded to our analyst teams who have exceptional analytical capabilities and rich industry experience to perform refined analysis and synthesize information. Finally, our editorial team carefully reviews the compiled report, performs quality checks to meet specified standards and blends it into our flagship research studies.

## OUR METHODOLOGY

Tech Archival research studies draw on extensive primary and secondary research, all aggregated, analyzed, cross-checked and presented in a consistent and accessible style to enable decision making.

Tech Archival prepares and maintains in-house databases of various market and industry related information which is created using in-depth interviews, surveys with key stakeholders followed by rigorous analysis using highly specialized modeling & forecasting tools. We also maintain extensive in-house databases of news, analyst views, company profiles, country profiles, macro-economic profiles which facilitate our researchers to offer accurate assessments and forecasts.

Our extensive secondary research activities equip us to stay up-to-date with the latest industry events, trends and developments. Our researchers aggregate and analyze a number of secondary information sources including national/governmental statistics, official international sources, trade associations, stock exchange and broker reports, company annual reports, business information libraries and databases, among many more.

Finally, all quality information is analyzed using efficient analytical tools to create genuine market insights and forecasts, which can then be refined according to specific competitive, regulatory and demand-related factors. This followed by our continuous and stringent quality checks ensures that our studies remain focused, accurate and up-to-date.
