

## **The Window Channel VENTANA Suite offering**

*Revised May 1, 2010*

The Window Channel VENTANA series features a selection of original HD video programs designed to create relaxation, meditation and background environments. Each program runs from 30- to 60-minutes and features 10 to 20 fixed-camera angle “windows” – with no irritating pans or pullbacks—accompanied by the naturally occurring ambient sound captured in Dolby 5.1 HD sound.

Each program is designed by carefully selecting a compilation of complementary windows to create a unique and engaging retreat from the distractions and noise of everyday life. The effect is a moving photograph—a metaphorical window to the world.

The Window Channel VENTANA Suite is offered in thematic genres that can be mixed and matched according to your audience, venue, destination, location or season.
