

CORPORATE NETWORK SECURITY

A Strategic & Educational Conference

October 16-17, 2008
Washington, D.C.

How Corporations Can Achieve Optimal Protection To
Defend Themselves From Cyber Criminal Activity

Cyber crime is rated the Number 3 priority for the FBI, behind only counter terrorism and counter espionage.

Nearly 672 electronic records containing confidential information are compromised every 5 minutes. These compromises are caused by internet hackers as well as internal errors. Some exposure of data is accidental, caused by administrative errors, insider abuse, stolen equipment and the like. Other times it comes from cyber thieves or disgruntled employees.

With Cyber terrorism continuing to escalate for the U.S. government and businesses of all sizes, computer experts recommend companies take the necessary steps to protect their valuable data. Some companies find it hard to justify spending money on network security, especially large amounts, however the financial burden will most likely be much higher if they don't protect themselves. Taking the necessary steps to defend themselves from hackers will not only help these companies protect themselves from criminals but also makes them less "attractive" to hackers and attacks.

Don't miss this national forum focused on exploring the most advanced and aggressive corporate network security defenses leading to a safe and secure enterprise and saving companies from financial loss and public embarrassment. It will highlight the best case studies and most advanced tools and strategies for addressing network security from top industry leaders. **Join us October 16-17, 2008 in Washington, DC**, for a gathering of CSO's, CTO's, directors and managers. This two-day strategic business forum will explore security issues such as data leakage, protection for the mobile worker and company-wide security awareness programs.

DISTINGUISHED SPEAKING EXECUTIVES INCLUDE:

- Craig Lucca, Manager of Information Risk; **BLOOMBERG**
- Patrick Hale, Deputy Director, State of Michigan; **MICHIGAN DEPARTMENT OF INFORMATION TECHNOLOGY**
- Peter Allor, Program Manager for Intelligence & Vendor Relations and Special Assistant to the GM; **IBM INTERNET SECURITY SYSTEMS**
- Rian Campbell, Information Security; **FEDERAL RESERVE BANK**
