A COUNTRY, CITY, TOWN, PLACE – NOW COMES ALIVE WITH TRAVELER

TRAVEL SMART WITH TRAVELER FROM GAMUT SYSTEMS

“The world is a book, those who do not travel read only a page” – St. Augustine. Welcome to Traveler! – The latest innovative Kiosk Solution from GAMUT Systems designed specifically for the Transportation and Tourism Industries. Used by Cities, Hotels, Chambers of Commerce and Businesses of all types.

Unlock a country, city, town and/or place with Traveler! Any and Every piece of information from any source of data can now be at your fingertips in real-time, virtually, with Traveler. That's the real benefit of Traveler—the single-view ‘Traveler Concierge’ solution for the Tourism and Transportation Industries ensuring enhanced customer satisfaction at every touch.

With Traveler, your customers can quickly get all the information they need and see other information they might be interested in. For example – a customer may find tickets to a Hockey Game – while viewing related information on restaurants to visit afterwards. Traveler is **NOT** a website with links to other sites! Traveler is a Composite Solution bringing data from multiple places together in an interactive nature allowing a customer to compose a single view picture.

Traveler is a state of the art software solution enclosed in a first class kiosk structure which is visually appealing and eye catching while remaining highly functional and intuitive. Why wait in line to speak with a concierge when you can interact with an easy-to-use solution which allows you to get information on restaurants, bus routes, metro lines, maps, movies, museums, plays, sports, entertainment and everything else a new place has to offer.

This highly flexible and scalable solution enables you to:

- ❖ Search information with an integrated virtual keyboard
- ❖ Unite information virtually from disparate sources
- ❖ Locate businesses and/or events on an integrated map
- ❖ Drill into high level information to find detailed descriptions
- ❖ Interact with the map feature moving in and out as well as North, South, East and West

With Traveler, entering the Tourism Marketplace, users from all over will now be able to gain quick access to the information they require to unlock a new destination to enjoy.

FACT SHEET

Why GAMUT Systems?

GAMUT Systems of Northern VA is a leader in product innovation focused on four major lines of business; kiosks, stands, software, & peripherals. With GAMUT's custom and innovative solutions it helps organizations become more focused. With GAMUT's innovative bundled solutions housed in its kiosks it is taking aim at solving legacy as well as new and emerging business problems.

Make our solution your advantage in creating that 'single view' you need to improve your customers experience while promoting your brand. To find out how Traveler can work for you, call 800.684.2688 toll free or e-mail info@gamutsystems.com

Traveler is a solution that grows as you grow. In all, you gain a versatile platform that helps you serve your customers better today with the assurance that you'll be able to easily support tomorrow's application needs.

Like many in the Tourism Industry – Hotels, Businesses, Chambers of Commerce, Transit Authorities, need technology to integrate and share information across domains providing a more robust personalized concierge service. This does not mean creating a website of various links to other information in a city – but to truly integrate this information so that a patron can now have all the information they need at their fingertips. Traveler not only unlocks information stored in multiple places – but also administers advertising in terms of a Screen Saver as well as a Survey at the end of each session to capture information about each personalized session with Traveler. This report is then aggregated and delivered to the place of business with information on what customers really think and what they are searching for.

Imagine the time & money you'll save by deploying Traveler today, as well as promoting your business with the best in 'Traveler Concierge' software. Think of the higher-quality decisions your patrons can make automatically with technology. Establish the 'WOW' factor.
