

LockSAF PBS-001 Personal Biometric Safe

List Price: \$349.95

PRODUCT DESCRIPTION

The **LockSAF PBS-001** is designed to protect and give quick access to your firearms and valuables. Easy to program and use, it takes one press of a button and a programmed fingerprint to open. The **PBS-001** is made with 9 gauge steel which is twice the thickness of other products to provide a strong tamper-proof box. Four pilot holes in the bottom panel make it easy to mount inside a drawer, a wall, or to any flat surface. This added feature secures the safe and helps keep it out of harm's way or from unwanted curiosity.

Although hardware is not provided, the unit will take any bolt up to 10mm that can easily be purchased at your local hardware store. Bolt length is dependent on the mounting surface. Additionally, the flip top provides easy access without being hindered by an enclosed space. The interior dimensions will allow storage for items up to 12 inches or 30 cm in length. The **PBS-001** fingerprint recognition window is located on the front panel of the safe. Each unit requires and is provided with a standard 9V battery that is located within the same panel under an easy access cover.

All **LockSAF** products come with a 30 day customer guarantee and 1 year limited warranty. If you are dissatisfied at all within the first 30 days after purchase, please feel free to return the safe and receive your money back. Every **PBS-001** is guaranteed against manufacturing defects for one full year.

PRODUCT DETAILS

355mm (W) X 260mm (D) X 116mm (H)
