Geer Services Launches New Domain Registration Service

JACKSONVILLE, Fla. – December 11th, 2008 - Geer Services Inc. (GSI), provider of web design and business solutions, has launched a new website for domain registration at www.GeerDomains.com, the home of the DomainigansSM. The new site provides the tools for do-it-yourself clients to check domain availability, register domain names, obtain shared hosting services, construct their own web pages and even implement a shopping cart. This service complements the current GeerBuilt[®] custom web site design, hosting and other programming services offered by Geer Services. Customers now have a one-stop-shop for all of their on line service needs.

"We are excited to introduce our new domain registration service offering," said Geer Services Executive Vice President Richard Geer. "We continually try to provide the products and services our clients desire, while providing the quality, integrity and commitment we have provided to customers since we opened in 2003. Their new domain registration web site has a consistent look and feel of larger domain registration sites, but you can actually contact the business owners if you want, or even come by our office if you are in the Jacksonville, Florida vicinity."

The new service can be found on the web at either www.GeerDomains.com or www.Domainigans.com. The service includes the popular "Website Tonight[®]", Quick Shopping Cart[®], Express Email Marketing[®], personal and business E-mail services including

Microsoft® Outlook® Group E-mail and many other easy to use on-line products. The GeerBuilt® custom web sites, on-line applications, Geographic Information Systems (GIS) and mobile applications remain premier service offerings, but the new domain registration service helps round out Geer Services' total product offerings.

About Geer Services Inc.

Founded in 2003, Geer Services Inc. is a Jacksonville-based company providing IT and Marketing Services to businesses, government, and non-profit groups.
