

Media5 Introduces the Media5Boss-Branch suite of Branch Office Secure Survivable Solutions

Media5Boss-Branch delivers secure and survivable real-time communications solutions for the enterprise and service provider marketplace

Sherbrooke, QUEBEC, February 05, 2009 – Media5 Corporation, a leading developer of advanced MMoIP technologies and services, today announced the release of the Media5Boss-Branch suite of secure and survivable solutions.

Security and Survivability in one Solution

Built upon the leading technologies of Mediatrix Telecom and M5T, the Media5Boss-Branch (**Branch Office Secure Survivable**) is an advanced solution offering both Security and Survivability in a powerful multi-functional product. The Media5Boss-Branch solutions enable Enterprises and Service Providers to connect branch offices to central data centers or to hosted service offerings.

The Media5Boss-Branch solutions are specifically geared to support real-time communication scenarios like Voice over IP, as well as to accomplish branch office consolidation of their IT infrastructure while assuring the quality of service, security and features transparency of their communication infrastructure.

Survivability and Security are key differentiators for the Media5Boss-Branch.

- Allows branch offices to maintain phone service through an integrated SIP Proxy during Internet interruptions.
- Allows secure branch office communication through the encryption of media and signaling.
- This solution is transparent and requires minimal configuration.

Media5Boss-Branch is designed for branch offices up to 150 users, and can be configured with several types of voice gateway interfaces (FXS / BRI / PRI). For offices with more than 150 users, Media5 has introduced the Media5Boss-Convergence line of products.

“Service Providers and Enterprises are more and more looking to easily deploy secure and survivable multi-function solutions at a cost-effective price point,” explained Marc Skinner, Mediatrix PLM Director at Media5. “The Media5Boss-Branch combines VoIP gateways with a SIP Proxy, Encryption, Firewall, LAN router and QoS to meet these needs with a solution that is optimized for branch office applications.”

About Media5 Corporation

Media5 Corporation has built upon the leading technologies of Mediatrix Telecom and M5T to develop advanced, secure, and survivable MMoIP (Multi-Media over Internet Protocol) products, technologies and services for Service Providers and Enterprise Networks. Media5 products and solutions are widely interoperable and have received commercial endorsement from some of the

world's leading manufacturers of telecommunications equipment as well as from large telecommunication carriers.

Powerful Expertise & Technology

Media5 will continue to offer the following industry leading brands of MMoIP solutions:

- Mediatrix VoIP access devices and gateways, which are designed for the enterprise, SOHO, and Service Providers markets.
- M5T hardware and secure software technologies are aiming at chipset manufacturers, equipment vendors, and service providers developing applications and products for real-time multimedia communications over IP.
- Media5Boss, an all-in-one suite of solutions designed for security and survivability in multi-site, branch office environments.

Media5 has its corporate offices in the Sherbrooke area, in Canada, and regional offices in the United States, Europe and Middle East. For more information, please visit www.media5corp.com.
