

## Media5 Introduces the M5T SCE *Mobility* SDK for iPhone SIP Applications

M5T SCE *Mobility* SDK facilitates the creation of secure SIP-based applications by developers for the iPhone

Sherbrooke, QUEBEC, April 02, 2009 – Media5 Corporation, a leading developer of advanced SIP technologies and services, today announced the release of the M5T SCE *Mobility* SDK, a software development kit (SDK) allowing third parties to create secure SIP-based applications that can run directly on the iPhone.

The M5T SCE *Mobility* SDK provides tools and components to meet the requirements of software developers looking to quickly integrate SIP (Session Initiation Protocol) functionalities with enhanced stability and interoperability, including security features like TLS/SRTP, into their iPhone applications.

The M5T SCE *Mobility* SDK is built over the M5T Framework and M5T SIP Client Engine (SCE), offering a suite of high-level C++ APIs based upon RFC 3261 and other IETF RFCs, which take care of all SIP signalling and RTP media handling details. The M5T SCE *Mobility* SDK also offers a layer of abstraction for a wide range of supported platforms and operating systems and thus works on all platforms and operating systems supported by the M5T Framework; including Linux, VxWorks, WindowCE, Symbian, Windows and eCos.

“We’ve had significant demand from our customer base for iPhone support, as companies want to allow the iPhone as an approved device choice along with their other smartphone devices,” explained Samuel Guénette, General Manager of M5T. “With the M5T SCE *Mobility* SDK, we offer a new product to the large iPhone community with thousands of developers and enable them to integrate secure SIP functionalities into any application.”

### About Media5 Corporation

Media5 Corporation has built upon the leading technologies of Mediatrix Telecom and M5T to develop advanced, secure, and survivable Multi-Media over Internet Protocol (MMoIP) products, technologies and services for Service Providers and Enterprise Networks. Media5 products and solutions are widely interoperable and have received commercial endorsement from some of the world’s leading manufacturers of telecommunications equipment as well as from large telecommunication carriers.

### Powerful Expertise & Technology

Media5 will continue to offer the following industry leading brands of solutions:

- Mediatrix VoIP access devices and gateways, which are designed for the enterprise, SOHO, and Service Providers markets.

- M5T hardware and secure software technologies, which are aimed towards chipset manufacturers, equipment vendors, and service providers developing applications and products for real-time multimedia communications over IP.
- Media5Boss, an all-in-one suite of solutions designed for security and survivability in multi-site, branch office environments.

Media5 has its corporate offices in the Sherbrooke area, in Canada, and regional offices in the United States, Europe and Middle East. For more information, please visit [www.media5corp.com](http://www.media5corp.com).
