# Computer Forensics

## What is Computer Forensics?

Computer Forensics is the art of gathering digital artifacts in a technically sound manner that will enable it to be used as legally substantiated evidence, in a court of justice.

## When do I need computer forensic services?

These services can be used in any situation where a digital device could potentially hold evidence to support a judicial decision, for example: text messages sent via cell phones or an email send via PC or Blackberry device. Those techniques are also used to uncover electronic documents that have been hidden or deleted from a Personal Computer

## Why should I choose Data Analyzers?

We have established relationships with the legal community, e.g. Lawyers, Sheriffs and Judges.

All of our Examiners are Certified Computer Forensic Specialists. We have the ability to perform Forensic imaging and analysis on most PC based systems and digital devices, including Windows, UNIX, Linux and Macintosh PC Systems, Servers, Laptops, Digital Recorders and Hand-held devices.

We are a local firm and can respond immediately to your needs.

Our Certified Computer Forensic Specialists are ready to gather digital artifacts that can support your litigation. If you are looking for an expert that understands data and all it's complexity of how it is stored, hidden and terminated in various type of file systems then you have come to the right place.

## Our forensic team can provide you with the following services:

- Litigation Support
- Expert Witness Services
- Divorce Cases
- Copyright Infringement
- Computer Hacking & Network Incidents
- Digital Forensic Analysis
- Employee or Employer misconduct
- Insurance Fraud Cases
- Mobile Forensics
