

# Convertec™ Broadband Telephone Service. Powered by VoIP.

**Realize significant cost savings at home or for your business and say goodbye to the old fashioned way of calling**

## Benefits

### Powerful Network

Convertec's 100% redundant network and group of powerful telecom players ensure a robust, quality infrastructure to place calls over.

- E911 enabled network means that your safety is assured.

### Strength and Flexibility

- 93% On-Net coverage to over 7000 rate centers nationwide have you covered no matter where you go.
- Worldwide call termination with rates that won't break the bank.
- Add, change, or upgrade services in a flash with same-day service.
- Take your phone with you when you travel with the power of our analog telephone adapters that are easily portable.

### Efficient Installation and Support

- Installs into existing home phone wiring in most cases without the need to change anything.
- Remote updates and configuration assistance available 24x7.
- Failover support for cases of power or internet service provider outages.

### Broad Feature Set

With Convertec broadband phone service you are no longer tied down by packages that give you features you don't need or want just to get the one feature that you do want. We include standard features like voicemail, caller ID, call forwarding, and call waiting at no additional cost.

## Serious Cost Reduction:

A Convertec broadband phone line can typically save you about half when compared to traditional phone service. For large scale users the savings can be even greater. As an example, prices start from \$23.99 for a residential line with many of the features you would normally have to pay for. With Convertec there are no contracts to hold you down and support is always a phone call away.

## Control:

Convertec broadband phone service allow you many options when communicating. You can use existing phones or phone systems in most cases, utilize soft phones for use on your computer or laptop, or standards based SIP phones for flexible and easy placement almost anywhere you can imagine. Access to voicemail is available anywhere, and audio attachments of your voicemails can be emailed to you for even greater flexibility.

## Portability and Choice

With Convertec broadband phone service you can bring your number from current carrier, get a new number, or select a number in an area where you have family or friends to save them on long distance charges. Additional numbers are available on any existing line and can be added for a nominal monthly fee. If you have an analog telephone adapter you can bring it with you when traveling and have your home or business line with you no matter where you go.

the acquisition of an Asterisk Phone System.
