## **GPS NAVIGATION** **Commercial Drivers**

**Teletype offers both turn-key and customizable truck-specific routing and mapping for portable navigation devices. The turn-key solution is based on Teletype's WorldNav portable GPS product line. Customized solutions can be created using either Teletype or third party devices.**

### **COMPATIBILITY**

#### **Operating Systems**

Windows CE 4.2 and higher  
Windows XP, Vista, 2000, Embedded

#### **Platforms**

ARMRel - WinCE 3.0  
ARMV4Rel - WinCE 4.2  
X86 - WinCE 4.2

### **Benefits**

- **Easy to use** - based on familiar portable navigation software, and yet the commercial driver can rely on the routing as it takes into account commercial truck restrictions such as bridge heights and clearances, load limits, one-way road designations, left-hand and dangerous turn restrictions, and allowances. The restrictions are based on semi-trailers, 13'6" height, 80,000 lb weight, 48' and 53'/102" length, and 96" width restrictions.
- **Robust map coverage** - U.S. and Canada map coverage with expandable coverage for Europe, Central and South America.
- **Choice of hardware** - select Teletype navigation devices or third party Windows CE or Windows XP platform devices.\*
- **Turn Key or Customized solutions** - choose off the shelf solutions or use Teletype SDKs to create custom solutions.

### **About Teletype**

Established in 1981, Teletype has emerged to become a leader in the field of Global Positioning Systems. Teletype specializes in software system integration and produces innovative products for a variety of industries. GPS software solutions include support of Windows CE, Pocket PC, and Windows XP, for vehicle navigation, fleet tracking, and geographic information system data collection.

\* Third party support available to manufacturers and distributors only.
