

Company Profile

Founded in 1981, Teletype Co., Inc. is a software development company based in Boston, MA. Building on over 28 years of experience, Teletype specializes in software system integration and has produced cutting edge products in a variety of industries.

Teletype's award winning GPS solutions include support for embedded mobile devices, portable vehicle navigation, and fleet tracking. Each Teletype product delivers superior value by providing a complete GPS solution to meet the consumer's needs. Teletype products provide the latest in mobile technology in and an easy to use environment at an affordable price.

Teletype designs and implements navigation solutions within niche channels. Development is expanding to support additional emerging technologies for GPS solutions based on Bluetooth, satellite, and wireless communications. Teletype products are designed from the ground up using business-process-oriented, integrated, and modular architecture, thus offering comprehensive, scalable, easy-to-manage and deploy GPS solutions for specialized markets and developers. In addition to ready made products, Teletype offers a series of developer tools enabling custom maps and programming implementation within Teletype software.

Today, more than 28 years after its founding, Teletype is striving to produce customized GPS systems throughout the world. By incorporating its innovative global positioning solutions into the mobile devices of the future, Teletype will continue to provide an expanding presence in the GPS marketplace.
