## **VERIZON WIRELESS AND ACTSOFT BRING LATEST WIRELESS TECHNOLOGY TO WORKFORCE MANAGEMENT**

*New Relationship Combines Mobile Resource Management Technology with Streamlined Billing through Verizon Wireless*

**BASKING RIDGE, N.J., and TAMPA, Fla.** – Verizon Wireless and Actsoft, Inc. announced today a joint marketing relationship that makes Actsoft's suite of GPS-based business management applications available to customers of the nation's largest and most reliable wireless network. Verizon Wireless is also introducing a new billing option that can give qualified enterprise customers the convenience of having services, such as Actsoft's, billed to their Verizon Wireless bill.

Actsoft's Mobile Resource Management solutions enable businesses of all sizes to leverage the latest advances in GPS, mobile and Web technologies for improved economic efficiencies. Actsoft products give enterprise customers a deliberate level of control over their entire business and include the ability to improve workforce and asset utilization, control operating costs and mitigate risk.

Actsoft solutions available on the Verizon Wireless network include:

- **Comet EZ** – A simple, Web-based GPS tracking and time keeping solution, accessible from any PC with Internet connectivity
- **Comet Tracker** – A more robust solution that is both client- and Web-based, provides order entry dispatch, wireless forms, customized alerts and valuable reporting capabilities

- **Comet Mobile Worker** – Actsoft’s most advanced product serves as a turn-key solution for everything from work order management to vehicle engine monitoring

“We are extremely enthusiastic about launching our products on the Verizon Wireless network,” said Tom Mitchell, Actsoft’s chief executive officer and founder. “This relationship is a significant contributor to Actsoft’s ongoing success in a competitive, yet very exciting, market.”

Actsoft will be among the first companies to take advantage of the new Verizon Wireless single billing option. Verizon Wireless will roll out its single bill program to other select solutions providers this year.

“We are pleased to have the suite of Actsoft enterprise software solutions available through our joint marketing relationships and even more excited that we can offer customers the convenience of a single bill,” said Rose Kirk, vice president – enterprise and government operations for Verizon Wireless.

“Tracking invoices can be time consuming for customers who need to be able to analyze wireless expenses in an environment that reflects total spend. Our single bill platform can help customers better understand their wireless investment.”
