Moodlerooms and DubMeNow Release joule™ Mobile Application
Partnership Furthers Extensibility of Managed Open-Source e Learning Platform

Baltimore, MD —**Moodlerooms, Inc.**, provider managed open-source e Learning solutions, in partnership with **DubMeNow**, a leading developer of modern communication applications, has released **joule™** Mobile, an application that will extend the online classroom and deliver on-the-go access to **joule™**, Moodlerooms' enterprise learning management platform.

The mobile application keeps students engaged with campus events, news, courses and interactive maps, while educators are provided with a mechanism for delivering course related information and materials through joule. The application can also be configured to display themes, color schemes and logos specific to a particular institution.

"Moodlerooms' release of joule Mobile puts us on the forefront of mobile education technology," says Moodlerooms Vice President Joe McAvoy, "We are pushing forward to provide our customers with extensible e-learning solutions that encourage communication, collaboration and education without traditional boundaries."

joule Mobile is supported on multiple mobile platforms, including Apple iPhone, RIM Blackberry, Android, Symbian and Windows for Mobile.

"Today's students expect the ability to access and interact with information anytime, anywhere," said Manoj Ramnani, DubMeNow CEO & Founder. "We're excited to work with Moodlerooms to bring learning management components on our open mobile platform for higher education."

About Moodlerooms (www.moodlerooms.com):

Moodlerooms strives to provide educators and learners across the globe with an e-learning platform that is flexible, reliable and affordable. By combining cloud hosting, managed open-source, and Software-as-a-Service delivery, Moodlerooms' customers receive the benefits of open-source Moodle with enterprise-level support, services and features so they can focus resources on what really matters — quality teaching and learning.

About DubMeNow (www.dubmenow.com):

DubMeNow develops innovative ways to communicate, network, and exchange information – all from a mobile phone. Powered by DUB is the first comprehensive and intuitive open, mobile application platform for higher education, associations, and events.
