

FairwayPro®

ULTIMATE DIVOT SIMULATOR

The FairwayPro Product Line

INSTALLED VERSION

Best-performing Golf Mat System For Practice Ranges, Golf Courses, Country Clubs, Simulators & Teaching Facilities.

PORTABLE VERSION

Your personal fairway. Take it to the practice range, use it at home, or wherever you practice golf.

■ Golfers no longer have to settle for static range mats that don't react the same way grass does.

■ The patented design has a sliding turf tray that allows golfers to hit down-and-through and compress the ball, accurately simulating ball flight and the feel of carving out a divot after striking the ball.

■ FairwayPro is the closest thing to hitting off the fairway ever developed while providing the most forgiving surface, reducing the punishment from fat shots.

■ Best choice for discriminating golfers who want true feedback while practicing on artificial turf.

U.S. Patents 6,994,634, 7,384,346 and 7,699,715. Other U.S. and international patents pending.

FairwayPro®

ULTIMATE DIVOT SIMULATOR

Enables Correct Golf Swing & Simulates Accurate Ball Flight

At the heart of the patented FairwayPro mat system is our high-performance forward-sliding turf tray. It's the only hitting surface that reacts like real grass, sliding forward and giving way just like natural turf does.

Ball tray functions as weather protection module and features interlocking weather-stripping protecting the FairwayPro hitting unit and turf from extreme weather conditions.

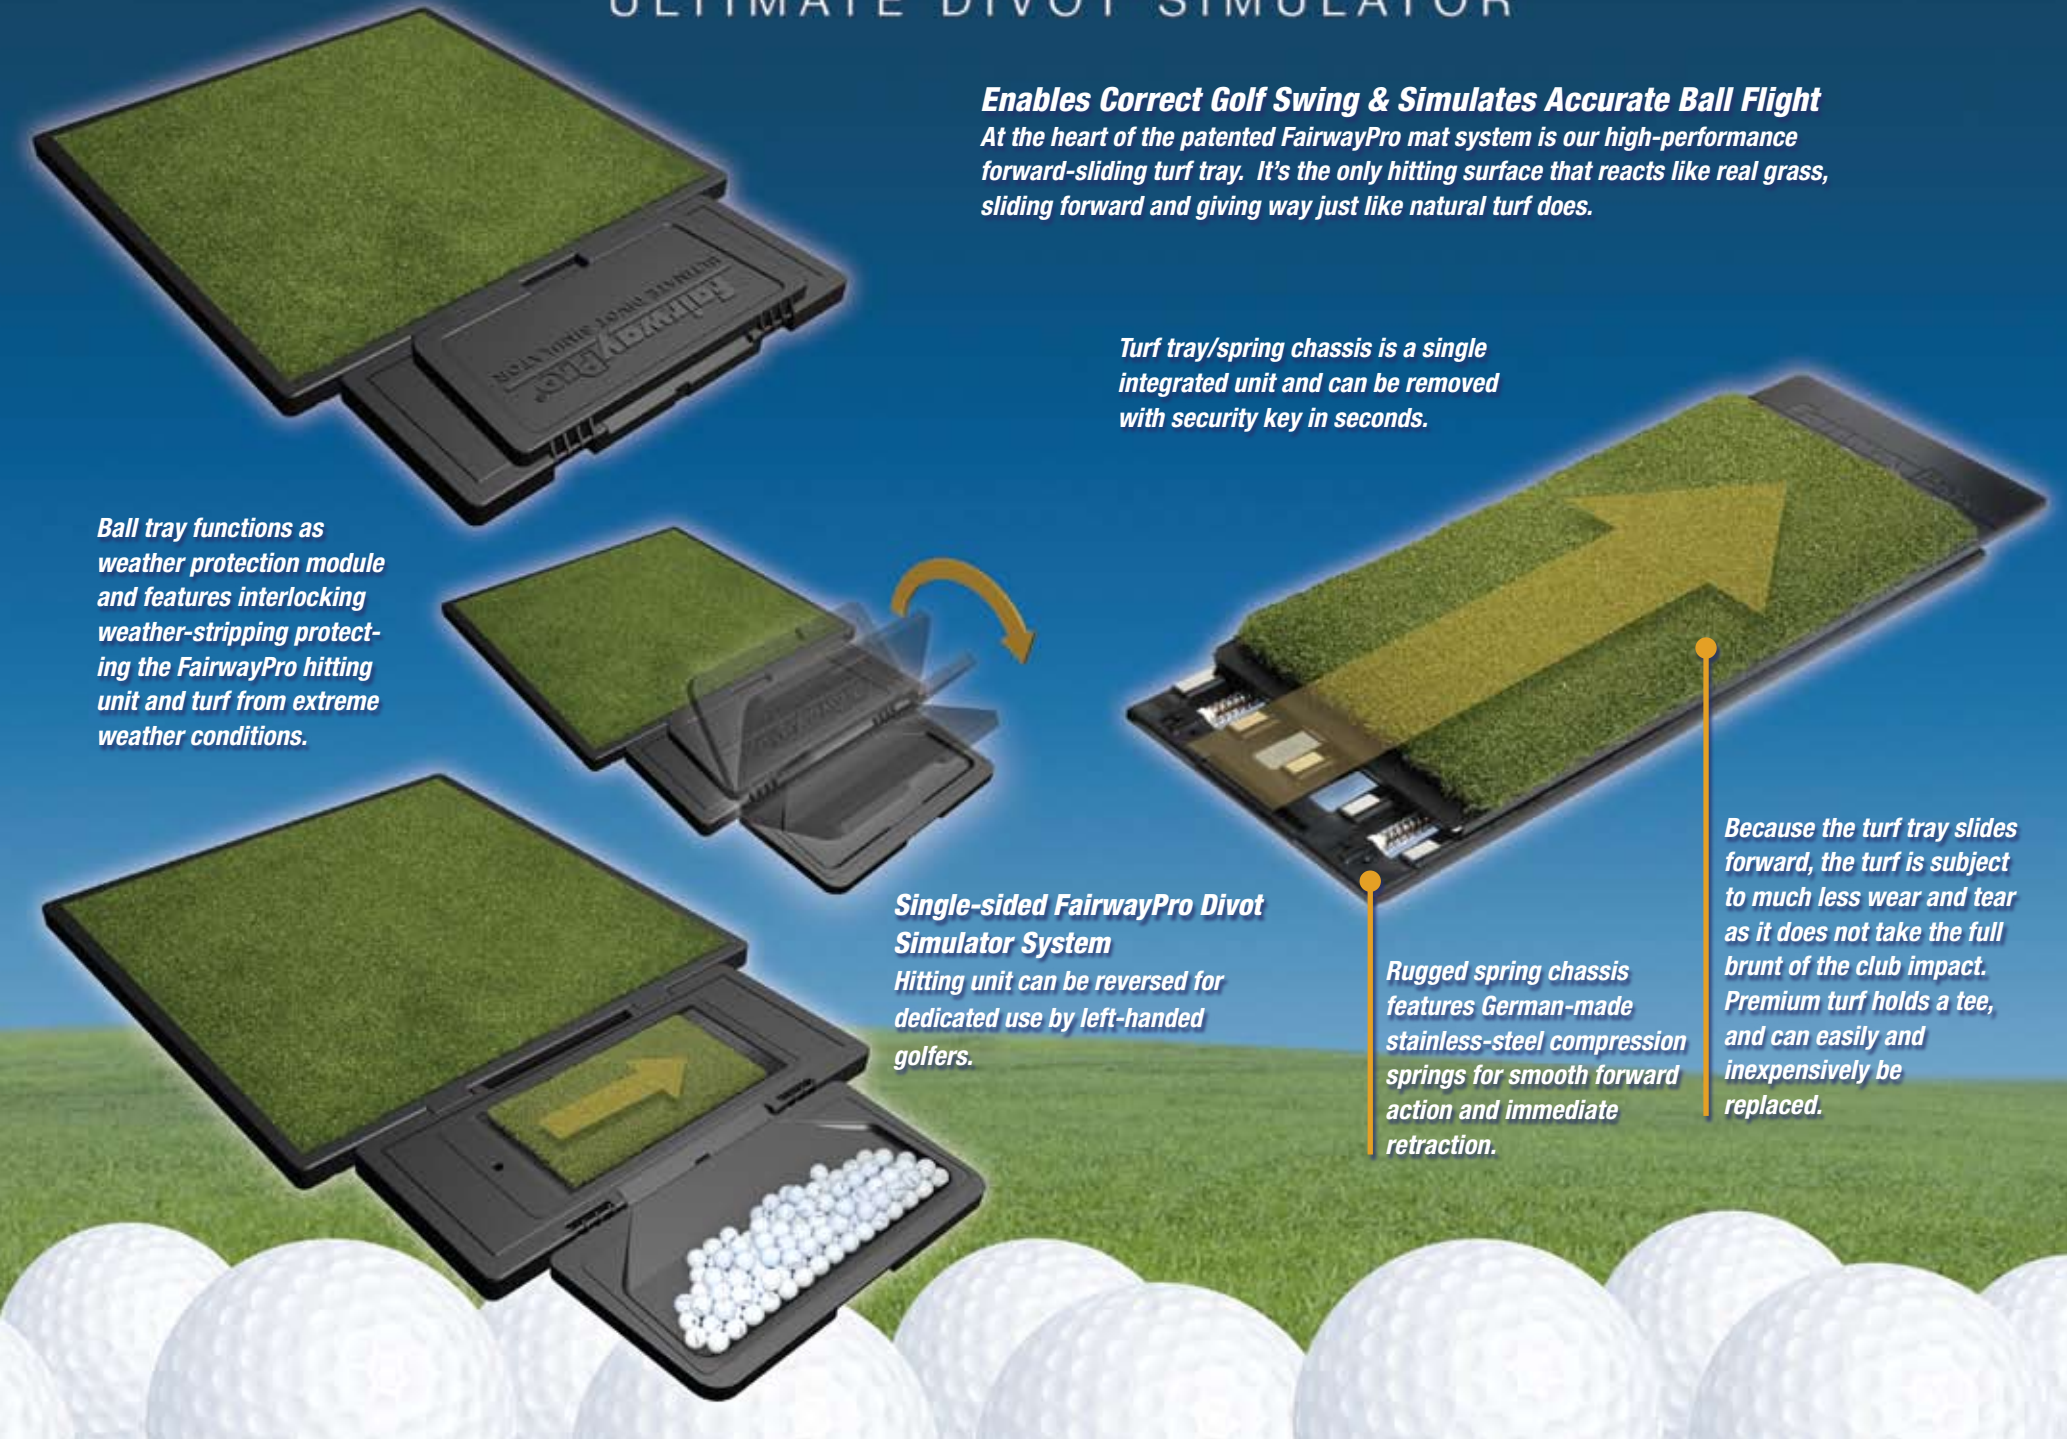

Turf tray/spring chassis is a single integrated unit and can be removed with security key in seconds.

Single-sided FairwayPro Divot Simulator System

Hitting unit can be reversed for dedicated use by left-handed golfers.

Rugged spring chassis features German-made stainless-steel compression springs for smooth forward action and immediate retraction.

Because the turf tray slides forward, the turf is subject to much less wear and tear as it does not take the full brunt of the club impact. Premium turf holds a tee, and can easily and inexpensively be replaced.

FairwayPro®

ULTIMATE DIVOT SIMULATOR

Shown below, FairwayPro hitting unit can easily be adapted, by adding an appropriately sized protective cover, to fit many existing golf mat systems, golf simulator systems and training facilities.

Tee insert extender takes a standard tee and is anchored in the rear of the protective cover as shown below .

Shown below is our module for underground auto-tee-up systems in place of our standard ball tray. Module can be adapted to work with most auto-tee-up systems.

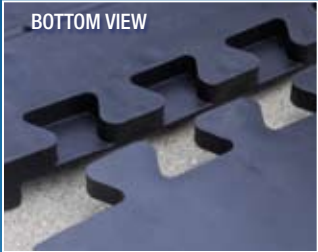

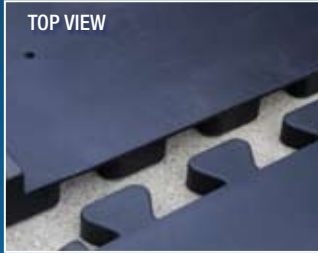

Double-sided FairwayPro Divot Simulator System For both right- and left-handed use.

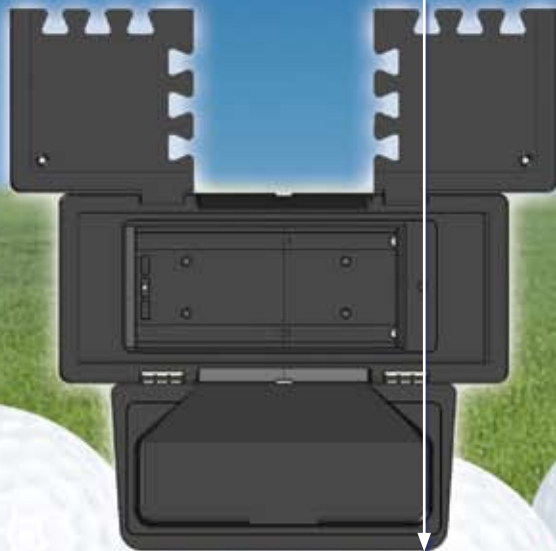

FairwayPro®

ULTIMATE DIVOT SIMULATOR

Mat base uses interlocking parts to reduce shipping costs and allows for different configurations.

Pictured at right are the same components reversed to configure as a double-sided mat.

DOUBLE-SIDED SYSTEM 116.25 in (295.3 cm) (total length after assembly)

SINGLE-SIDED SYSTEM 83.25 in (211.4 cm) (total length after assembly)

15.5 in (39.4 cm)

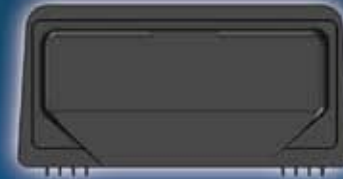

14 in (35.5 cm)

17.5 in (44.5 cm)

50.25 in (127.5 cm) (after assembly)

17.5 in (44.5 cm) (after assembly)

16.75 in (42.5 cm)

BALL TRAY 32 in (81.25 cm)

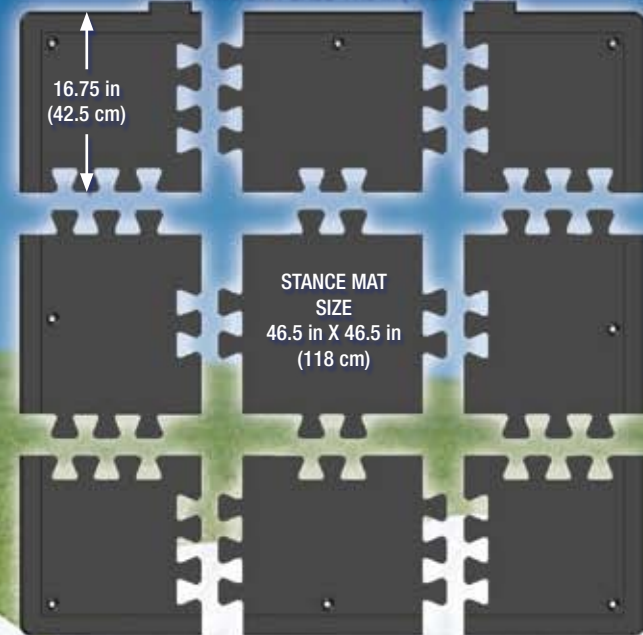

TURF
20 in (50.7 cm)
X 11 in (28 cm)

PROTECTIVE COVER 38 in (96.5 cm)

HITTING UNIT BASE 41.5 in (105.4 cm)

STANCE MAT
SIZE
46.5 in X 46.5 in
(118 cm)

STANCE MAT BASE 50.25 in (127.5 cm) (after assembly)

FairwayPro®

ULTIMATE DIVOT SIMULATOR

PORTABLE VERSION

Golf is a game that is played on grass. That's why FairwayPro personal fairway is engineered to enable golfers to hit down-and-through, as on natural turf, while practicing at the driving range or at home. It's a brand-new way to practice, and you just might find it as enjoyable as playing a round of golf!

Handle-and-panel assembly is detachable and can be switched for left-handed golfers.

Made from the finest materials including high-strength aircraft aluminum for light weight, strength and portability.

**TAKE
CONTROL
WHEREVER
YOU PRACTICE**

Panel fits under standard range mat for added stability.
