

What Makes Oregano Oil So Special from OreganoWorld.com?

[Oregano World](#)

Our Oregano Oil is Wild Grown Mediterranean - Origanum Vulgare

(No chemical pesticides, herbicides, fungicides, or fertilizers are applied to these herbs.)

Called "The-First-Aid-kit-in-a-Bottle" No person should be without it. Why is this so beneficial?

Anti-bacterial

Anti-viral

Anti-fungal

Anti-oxidant

Anti-parasitic

PLUS, Over 50 benefits...

100% Pure Oregano Oil from Greenfield Naturals may prove beneficial in the treatment of the following conditions:

Abrasions

Acne

Allergic Rashes

Now the rest of the story...

The oregano I am going to address in this article isn't that tasty traditional spice found in spaghetti sauce and pizza. One of the most potent and powerful of the essential oils, oregano oil has a long and ancient history of medicinal uses, yet unfortunately fell out of favor with us moderns as a consequence of the 20th century proliferation of pharmaceutical companies which were the brainchild of Rockefeller, an oil baron of the early 1900s. Rockefeller of the Standard Oil Company along with other monopoly barons such as the DuPonts, were visionaries who understood the concept of patents and were powerful enough to influence the governments of their day to legislate strict controls on natural products while protecting the interests of their patented synthetic products. As a consequence of their efforts over the past century, these corporate giants has enjoyed mind boggling success and continue to wield their mighty influence over virtually the entire planet to the extent that even our history, science and medical books reveal their bias and are written to support their corporate agenda while offering nothing but disparagingly veiled comments or silence in regard to the benefits of nature's medicinals. With that in mind, we can hopefully now begin to understand why oil of oregano, one of nature's wonders has remained to this day, a

Animal Bites

virtual secret to most people.

Arthritis

Why Is Oregano Oil Considered Medicinal?

Athlete's Feet

Oregano oil is considered medicinal because it has healing properties that are both aggressive and supportive in that this oil attacks pathogens within the body while at the same time feeding the body a multitude of necessary life promoting energized minerals and nutrients.

Bad Breath

PubMed lists almost two hundred studies that have been done on the beneficial properties of oregano oil. Although all these studies have taken place in the laboratory and not on human subjects they reveal the efficacious nature of this oil in dealing with pathogens as well as containing numerous essential minerals.

Bed Sores

Additionally, we have thousands of reports logged since antiquity extolling the virtuous healing powers of Oregano Oil.

Bee Stings

Bladder Infections

Boils

Bronchitis

Burns

Bursitis

Candidiasis

Minerals And Vitamins Present In Oregano Oil And Their Benefits.

Canker Sores

Colds

Calcium

Cold Sores

Richer in calcium than cheese, dark green vegetables, salmon, sardines and milk.

Colitis

Feeds bones, gums, teeth, heart, cells skin, nervous system.

Cradle Cap

Magnesium

Croup

Richer in magnesium than cashews, peanuts, molasses, whole grains, beet greens and spinach.

Cuts

Feeds enzymes, arteries, soft tissues.

Dandruff

Zinc

Ear Infections

Richer in zinc than sardines, salmon, cheese, peanut butter and whole grains.

Ebola

Feeds the prostate, reproductive organs, immune system, skin, smell and taste

Eczema

Iron

Listed as one top eight sources of iron.

Feeds hemoglobin, myoglobin, blood, immune

Fingernail/ Hang Nails	system, growth and energy
Flu	Copper
Food poisoning	Feeds bone, hemoglobin, blood, energy, healing, hair and skin color, taste, nerves, joints.
Fungus/ Fungal Infections	Potassium
Genital Warts	Richer in potassium than orange juice, bananas, apricots, dates and dark, leafy vegetables.
Giardia Infections	Feeds the nervous system, heart, cells
Gum Disease	Niacin
Head Lice	Equal to niacin content in beef, commercial rice and whole wheat.
Illnesses - Tickborne	Feeds circulatory system, skin, nervous system, metabolism, digestive system
Impetigo	Vitamins
Insect Bites	Boron, manganese, vitamin C, Vitamin A (beta-carotene), Vitamin K, riboflavin, thiamine.
Intestinal Parasites	Positive Ionotrope
Jock Itch	Strengthens the pumping of the heart.
Kidney Infection	<i>All Plants And Herbs Have Medicinal Properties</i>
Psoriasis	Since antiquity man has noted the potent medicinal benefits of all plants and herbs that grow on the earth. Hippocrates, the famous ancient greek physician stated, "Let your food be your medicine and your medicine be your food". Sadly, modern man has been
Pulled Muscles	brainwashed to believe that without man made pharmaceuticals, our civilization cannot survive.
Puncture Wounds	This absurd assumption is a bodacious fallacy when we consider that for thousands of years man has flourished on the earth without the intervention of synthetic or refined products.
Pyorrhea	Our modern infatuation with attempting to improve upon nature is a consequence of our culture's rebellious bent which believes that we can improve upon the earthly provisions God
Ringworm	has given us for blessings, health and overall well being. We are surrounded by a world full of naturally occurring remedies, foods, herbs and medicines which are packed with the energy to
Rosacea

heal us and oregano oil is just one of thousands that we have been blessed with.

The primary ingredients of oregano oil are the phenols, Carvacrol (60-80%) and Thymol (5%) which provide the antiseptic and antioxidant components. They are also the terpenes, pinene and terinene which contribute to the antiseptic, antiviral, anti-inflammatory and anesthetic properties. Two long chain alcohols, linalool and bonreol also beef up the antiseptic and antiviral qualities. Lastly, the esters, linalyl acetate and granyl acetate act as powerful antifungal agents. It is the synergy of these components working together that allows for the healing powers of oregano oil to have their powerful effects on our bodies. Pharmaceutical companies in ignoring the power of this natural synergy do what they do with all the natural God given medicinals which is to extract the main ingredient and create a new product. Unfortunately their newly created and thus patentable products bear similarities to the naturally occurring medicinals but not enough to make them recognizable to our body systems which often times will treat them as pathogens or unrecognizable foreign invaders thus creating the typical multitude of detrimental side effects so common with pharmaceuticals.
