Excalibur Technology Announces Pinellas County, FL Franchise Opens!

Largo, FL – Scott Cummings, founder and CEO of Excalibur Technology formally announced the grand opening of the Pinellas County, FL franchise office.

Cummings stated, “I am pleased to announce the opening of our Pinellas County office, our first corporate branch location. This is a great step in continuing to build our successful company into a nationally reaching firm.” Excalibur Technology has opened several franchise locations around the United States, with three of them being located in Tampa, Miami, and Melbourne, Florida.

Two additional franchise offices are due to open before the end of 2010.

When asked about the service his company provides, Cummings stated, “Excalibur Technology promises to bring the same great service to Pinellas County businesses as we have for almost two decades in Illinois. Even as our economy recovers, it is important for business owners to save money where they can and ensure that their I.T. spending is carefully controlled. We are the only nationwide franchise company to offer a complete set of business technology solutions including network support, website design, programming and data center services. We make effective use of technology to help our clients save on their IT service costs.”

Excalibur Technology continues to help business owners reduce their technology costs and increase their productivity by offering several packages including flat rate cost support. This allows any size business to exactly budget their I.T. spending which can often spiral out of control. Excalibur Technology employees are business consultants and certified engineers – not just computer repair “geeks”. Because Excalibur Technology believes in America, all of their work and support is performed by staff members in the USA – they never outsource.

The Pinellas County office will be headed by Scott Cummings, who recently relocated his family to Seminole, FL in order to help grow the company’s service area footprint. Scott founded Excalibur Technology 16 years ago and is currently the CEO. Scott has extensive experience with networks, websites, e-commerce and business systems. Regarding this large move, Scott states, “My family and I absolutely love Florida and I am extremely excited about bringing the reliability and trustworthiness of Excalibur Technology to the great business owners of Pinellas County. We promise to show up on time, provide excellent service, charge fair rates, and we always offer a 100% satisfaction guarantee. Technology support is a critical resource for business owners and we give small and mid-sized business owners access to the same quality of support enjoyed by the largest corporations in America, and do it at a price they can afford.” Scott further stated, “It is my goal to bring 10 new high tech jobs to Pinellas County by the end of 2011.”
