

ACS Releases Enhanced Ford Global Oasis Integration

Window's® Based ACCESS Dealer Management System (DMS) upgrades Ford communications with automated service interface.

Mobile AL.

October 18, 2010

Automotive Computer Services, Inc. (ACS) announced today the completion of their advanced Ford Global Oasis into its *ACCESS*® dealer management system (DMS). This new interface automatically provides service advisors using ACS *ACCESS* the additional information they need to make informed decisions as a customer repair order is created. The enhanced Ford **Global Oasis** is included within ACS' new Windows-based Service Writer Pro application and provides information for all Ford brands, including Ford, Lincoln and Mercury. Service Writer Pro is a standard part of the ACS *ACCESS* DMS.

To improve communications throughout the entire DMS, the new Oasis information is also accessible in the service appointment and technician portions of Service Writer Pro as well as ACSFirst, *ACCESS*' F&I application, using *ACCESS*' simple point-and-click format.

About ACS:

Founded in 1992, Automotive Computer Services, Inc. (ACS) offers dealers *ACCESS*®, a comprehensive, fully integrated Windows-based Dealer Management System. ACS is a Microsoft Automotive Retail Solutions partner providing Microsoft based solutions to dealerships throughout the United States.
