*Leading Team Alpha is a new novel that illustrates the five fundamental elements of business leadership through a compelling narrative with real life characters.*

*Lexington, Kentucky, Nov. 23, 2010* – Just published and in bookstores, *Leading Team Alpha* is designed to help students and professionals learn business leadership fundamentals. *Leading Team Alpha* is unique because it is not a business manual but a novel teaching the results of decades of leadership research.

**Plot and setting:** The story takes place primarily in Ann Arbor, Michigan, with several scenes in Bengaluru, India. Software business Dandadata suddenly finds itself trailing its major competitor, which has just announced a new version of their key product. Dean, a young manager at Dandadata, must rise to the occasion, rapidly build his small team and incorporate NU technology into the DandaData mainstream product line in time to save the company.

During this journey, the five fundamental elements of leadership are illustrated. These elements are distilled from decades of leadership research, and this unique format finally makes this academic research not only more accessible to the business community—but a lot more fun!

Observe the underdog Dean learning these leadership elements from insightful Sol, an old university professor, and watch eagerly as he applies them to his emerging team. Sol teaches the fundamental elements of leadership as:
