

# MANAGED LESS-THAN-TRUCKLOAD LOGISTICS

Want the entire LTL process managed better?  
We'll take the wheel.

**A successfully executed LTL program requires more than simply putting shipments together.** That is why we offer Managed LTL Logistics. That means a higher level of service, owning the full process end-to-end, from pickup to delivery and handling everything in between. We'll negotiate the best pricing, consolidate freight, and track proactively so that you can plan internally. In addition to our Transportation Management System, we provide you with a dedicated account team to manage the process from start to finish, ensuring your shipment is delivered on time and on budget. Call us today and put our Managed LTL Service to work for you!

**Full service. Full solutions. Flexible logistics.**
