

GOOD-BYE 1099

SO LONG PSEUDO W-2

“Work needs a new platform and I found the missing link: the B2b Vendor platform. My workforce now includes Companies of One, allowing me to replace cumbersome and expensive work arrangements with B2b Vendor contracts.”

The missing link in engaging contract talent

“And my people love the new relationship. Each operates as an autonomous Company of One with tailored health and retirement benefits, but without the burdens of business ownership.”

It's simple, compliant and cost-effective

Procuring the services of my contract talent is simple and cost effective, while the relationship is equitable and compliant. A secure and fair alternative for risky 1099 or expensive pseudo W-2 arrangements!

My contract talent
and flexworkers are
Companies of One

CHANGING THE WAY WORK WORKS

THE MISSING LINK IN ENGAGING CONTRACT TALENT

"BOTH is the missing link that executives like me need to reduce the costs, obligations and burdens of conventional flexible workforce solutions. With BOTH, I can invest more in the talent I need, eliminate hidden costs and implement a compliant, equitable engagement platform."

Conventional solutions fall short

All existing approaches either transfer the employer of record status to an expensive third party or resort to unclear work relationships that create tax and compliance liabilities. Furthermore, conventional models are employer-centric, tied to a specific project or assignment, and create disruption in the lives of the independent professionals involved.

Leverage the power of the B2b platform

BOTH is transforming employment arrangements into B2b Vendor relationships by establishing and supporting contract talent as individual business entities - Companies of One. Executives are leveraging the BOTH platform to procure the services of independent professionals in a secure, cost-effective way that is talent-friendly and provides an opportunity to build loyalty among contract workers.

THE COMPANY OF ONE AS A WORKFORCE OF ONE
