 - Column Span: 1

As an Introduction offer, the Control is being released with no Charge.

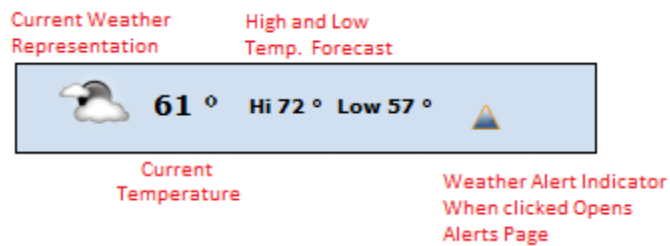

Weather Control for SAGE SalesLogix Web 7.5

Weather Control Features

The control presents the User 4 different Weather Points:

- A Visual Representation of the Current Weather Conditions (e.g. Partly Cloudy or Snowy)
- The Current Temperature
- The Forecasted High and Low Temperatures for the Day
- A Weather Alert Indicator. When an Alert is present, clicking on the flag opens up a Page displaying the Alerts information.
