New in V11 - Junction View, State Mileage, & More

TeleType is very pleased to announce the release of **Version 11 WorldNav Truck Navigation Software**.

Brand new features include Updated Maps, and Navigation software with Extended Address Recognition, Lane Assist, Junction View, and Electronic On-Board Recording System (EOBR). Optional accessories include Live Traffic Antenna, and Tire Pressure Monitoring System. Responding to driver feedback, additional new features include a separate State Mileage Odometer, Expanded My Point entry options, and Additional Trip Statistics such as multiple odometers to make record keeping fast and easy.

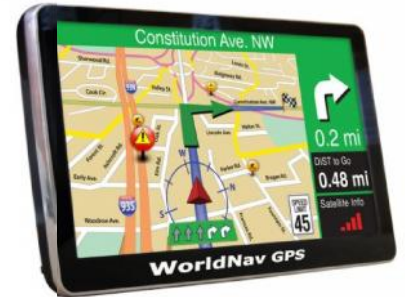

WorldNav top of the line 5" and 7" high resolution Trucker GPS models are now shipping with Version 11 offering the Junction View Feature which displays a realistic image of the upcoming Interstate Intersections with a directional arrow allowing you to better prepare for your next turn.

Updates are available for selected WorldNav GPS models, call for details.

5" GPS #520060, \$279
7" GPS #740060, \$349

Enhanced Trip Statistics show number of miles driven in each State.

WorldNav 7400 and 5200 Truck GPS now offers lane assist and optional live traffic updates.

Junction Views are available for most Interstates on all High Resolution WorldNav GPS models.

Tire Pressure

Easily monitor tire pressure directly from your touch screen GPS with convenient air flow through sensors.
