

GROCERY LOSS PREVENTION SOLUTIONS

When it comes to margin and profitability, there is not a more highly competitive industry than the grocery or food retail industry. Every dollar spent, even within your loss prevention initiatives, must show a return that maintains strong margins and increases overall profitability.

Grocers and food distributors must also maintain strict compliance as it pertains to food safety, alcohol and tobacco purchases and for those with in-store pharmacies, certain regulations for the distribution of controlled substances.

Most loss prevention departments have functional, if not direct, responsibilities in all of these business operations. However, sometimes resources, time commitments and budget dollars make it difficult to properly maintain a proactive, consistent program to support all of these business necessities.

LP Innovations provides grocers and food retailers with industry-specific solutions to help support these initiatives. Developed to coincide with your operations, corporate culture and existing loss prevention function, we assist in:

- **Reducing Food Cost and Loss**
- **Preventing and Resolving Theft Issues**
- **Controlling Inventory and Waste**
- **Ensuring Regulatory Compliance**
- **Expanding Your Loss Prevention Reach**
- **Complying with Food and Workplace Safety Regulations**

TRUSTED SOLUTIONS. PROVEN RESULTS.

SOLUTIONS FOCUSED ON SUPPORTING INDUSTRY NEEDS

FIELD LOSS PREVENTION SUPPORT

Our nationwide team provides theft investigations, audit and store visit programs, exception-based reporting analysis and more. Working together, our proprietary team of loss prevention professionals can help support your field team initiatives across the U.S. and Canada.

PERISHABLE AND NON-PERISHABLE INVENTORY ACCURACY OBSERVATIONS

Inventory accuracy is paramount in controlling food costs and food safety. Our programs provide a structured review of inventory procedures and completion, ensuring key steps in the accuracy of your inventory as it occurs. We provide programs to support both in-house and 3rd party inventory completion.

DISTRIBUTION CENTER AUDITS

Utilizing 3rd party distribution centers can assist grocers and food distributors in increasing their supply chain capabilities. Our DC Audit program is designed to ensure proper LP, security and safety practices are in place to protect your company assets and interest.

PHARMACY AUDITS & COMPLIANCE SERVICES

Failure to follow controlled substance and regulatory compliance procedures can result in substantial fines and penalties. Our team is experienced in providing a variety of pharmacy related services including operational and inventory audits along with analysis, investigation and development of programs to detect and prevent diversion of illicit substances.

AGE VERIFICATION AND REGULATORY VISITS

Our mystery shopping program and audit services can assist you in controlling the purchase of tobacco, alcohol and certain HBC products. Focusing on regulatory or age compliance, our visits will also provide insight into customer service, product knowledge and more, providing a complete review of how operations interacts with sales transactions.

HOW ARE TODAY'S GROCERS USING LP INNOVATIONS?

- A national grocer utilizes our Pharmacy Compliance Audits to provide a 3rd party review of their pharmacy operations and compliance, verifying internal self-audits.
- A regional grocer uses our Perishable Inventory Accuracy Observations to validate their in-house team inventories and to improve inventory procedures and accuracy.
- A nationwide grocery chain uses LP Innovations to support all of their Loss Prevention Field Services across the United States.
- A regional grocer utilizes LP Innovations to conduct Exception-Based Reporting analysis, detecting operational and loss prevention related issues.
- Other services provided to grocers include; Training & Awareness Programs, Full LP Program Development & Execution, Consulting & Assessments and more.
