

## **iQue Repair Announced the Grand Opening of its Largest Store and Internet Café in Layton, Utah for Apple Mobile Device Repair and iSmart Protection Plan Servicing**

*iQue Repair, a leader in the iPhone repair industry specializing in the restoration of iPhone, iPad, and iPod devices and home of the iSmart Protection Plan, announced the Grand Opening of its largest store and Internet Café in Layton, Utah, serving Ogden, Kaysville, Farmington, Anchorage, Bountiful, Roy, North Salt Lake and Salt Lake City.*

**Layton, UT, May 2012** – iQue Repair, LLC, [www.iquerepair.com](http://www.iquerepair.com), announced the opening of its third store in Layton, Utah. This third store represents another major step in establishing a chain of Apple mobile device repair stores and for servicing the revolutionary iSmart Protection Plan for iPhone, iPad and iPod repair.

When iQue Repair owner, K.C. Kelly was asked about their decision to open another store only four months after opening in Provo, he responded, “We are following a strategic plan that responds to our customer needs. We have been servicing mobile devices from Layton and surrounding cities for quite some time now. It only made sense to answer the demand by bringing our services to them. So once again, here we are, and we’re excited to be here.”

“Davis County is one of the densest population centers in Utah and we hope to have great success in this area as the only specialist in iPhone, iPad and iPod repairs.” Kelly continued, “This new store also includes an Internet Café with free WiFi for customers who want to wait for their repairs but they still need to stay connected for one reason or another. We accomplish many of our repairs while you wait, but if you can leave it in the morning, in most cases we’ll have it ready for you before closing.”

Morgan McKell, Co-Owner of iQue also commented, “Our technicians have repaired thousands of Apple mobile devices. All of the repairs are very delicate, and if you don’t have a lot of experience repairing the iPhone, iPad and iPod, you risk damaging them further.” He continued, “We have already repaired a number of The New iPads many refer to as the iPad 3. In fact, we have found that most repair shops have not repaired any iPad 3’ due to their supply chain, lack of experience, expense or risk. We make it affordable for our customers and affordably warranty it without proof of purchase.”

McKell added, “We have already had success with the local community’s response to iQue Repair’s Grand Opening in Layton and will continue to out to businesses and School

Districts by introducing our premier iSmart Protection Plan and Employee Benefits Programs to the fiscally minded.”

iQue Repair specializes in the repair of iPhone, iPad, and iPod devices, and provides a one of a kind cleaning, sanitation, and preventative maintenance program for each mobile device. They are also the home of the iSmart Protection Plan which is an extended warranty for iPhone, iPad and iPod repairs. They offer individual, family, group, corporate and School District plans and discounts.

iQue Repair is located at 711 North Main, Layton UT 84041 in Layton (adjacent to the Layton Wal-Mart), 2255 North University Parkway Suite 35, in Provo, Utah and at 7231 South 900 East, Suite 300, in Midvale, Utah.

“Our technicians are iQue trained and certified, and we will do our best to take care of your damaged mobile devices.” Kelly summarized, “Remember, iQue Repair is committed to restoring your technology to its fullest potential. Think repair, not replacement.”
