**How it Works:** Operation KidSafe captures your child's picture and fingerprints using a digital video capture device, digital ink-less fingerprint capture device and specialized software. The captured data is assembled and a quality 8 1/2 x 11" printout is given to the parent. The parent can use the printout they receive to provide to law enforcement anywhere in the world to *instantly* aid in an investigation.

**NOTE:** No database or records of children are maintained. The only record of the visit will go home with the parent for safekeeping. You don't need to bring any information and the service is FREE
