

FOR IMMEDIATE RELEASE

For Release
November 12, 2012

[New York, NY — November 12, 2012] — InterDyn is pleased to announce that two highly respected VARs, LBMC Technologies and L. Kianoff & Associates have joined our national network of providers.

The firms share like-minded decisions to join as it was very much about being a part of a network of resellers and consultants and expanding their product reach and knowledge set to remain competitive.

“We are proud to be part of this select association as it allows us to partner with these other strong firms on projects while providing extended solutions to our clients,” said LBMC Technologies managing partner Stacy Schuettler. “Given the drastic changes currently taking place in the technology industry, many consulting firms are being conservative. We are making big investments to continue to grow and expand our expertise and solutions offerings as are the other InterDyn firms. At the end of the day, my goal is to continue to add more value to our clients, provide continued learning and growth opportunity to our employees, and to ensure our long-term success.”

Lisa Kianoff is also looking forward to the partnership opportunities the InterDyn network will bring, as well as adding to the firm’s growth potential.

“You don’t commit to something like this if you don’t see it as another way to add value. In this business no one is smart enough to figure it out all themselves. You need collaboration and this [affiliation] takes it to another level,” said Kianoff. “We present ourselves as a larger, virtual company and offer our pool of resources to other InterDyn companies. We are confident our InterDyn relationship will add to our success.”

The addition of the two firms strengthens an already formidable national firm with software and services for Microsoft Dynamics Enterprise Resource Planning (ERP), Microsoft Dynamics Customer Relationship Management (CRM), Microsoft SharePoint, Cloud Solutions, Intacct, Business Intelligence, IT Managed Services, IT Networking and Infrastructure, and Custom Application Development.

“These firms cover additional geography and bring great new talent to InterDyn overall and we are delighted that they have joined us” said John Hendrickson, CEO of InterDyn.
