DISA Expands Transportation Compliance Service Offerings with Operating Tax Systems

Operating Tax Systems (OTS) has joined DISA Global Solutions, Inc. as a wholly-owned subsidiary. OTS is currently the only full-service tax outsource provider for the trucking industry in the United States and Canada.

Located in Stow, Ohio, OTS has been providing fuel tax reporting, HOS driver log auditing, licensing, permitting and tax recovery services to the trucking industry since 1991.

“This transaction has given DISA the opportunity to offer an expanded line of transportation compliance services to our clients,” said Jeff Boyle, DISA CEO. “OTS has a proven system for assisting clients with their compliance needs and for making their daily operations more efficient.”

OTS systems seamlessly integrate with all dispatch, GPS and fuel systems, which allow pertinent information to be captured directly, avoiding costly data re-entry. OTS also offers a paper-based data conversion service for those accustomed to more traditional recordkeeping methods.

OTS company founders and principals have managed tax departments of some of the world’s largest trucking companies and bring a combined 125 years of transportation industry experience.

DISA, Inc. (www.disa.com) - DISA has been in business since 1987 and specializes in delivering comprehensive employee screening and compliance services to safety-sensitive employers around the globe. The company’s international services include drug and alcohol testing, background screening, occupational health screening, safety training, and driver qualification file management.
