Town Line Technologies - New Image Sensor Technologies Provider

Former Panavision Imaging Senior Staff Launches New Startup Company

Cortland, NEW YORK – Newly formed Town Line Technologies has been created to design full custom image sensors, as well as providing consulting, layout and design services related to image sensing applications. Operating as a fabless business model, Town Line Technologies will engage in contract/development work, leveraging experience of over 25 years in the image sensor business. Town Line Technologies, LLC was formed following the sale of Panavision Imaging to Dynamax Imaging in December 2012

Company Founder and President Mike Joyner: “Each of us literally have decades of experience designing image sensors, and invented patented technology in use today. Let our team of experts create your full custom image sensor, or design your next IC/PCB layout. Town Line Technologies will provide you a solution and personal service that will make your next project a great success”

About Town Line Technologies:

Located in scenic upstate New York in the town of Cortland, Town Line Technologies, LLC is a technology consulting/contract services provider specializing in CMOS image sensors, mixed signal IC design, and PCB design/layout. Visit us at www.townlinetechnologies.com
