**FOR IMMEDIATE RELEASE:**

**EXCEL LEARNING CENTER FLIPS THE SWITCH ON NEW SOLAR SYSTEM**

**July 16, 2013 (Mt. Laurel, NJ)** - Excel Learning Center, a premier childcare facility serving South Jersey, will flip the switch on a brand new solar system at their beautiful six acre Mt. Laurel campus. The 52kW system, designed and installed by the energy experts at Moore Energy, is estimated to cover over fifty percent of the childcare's electricity needs. The system is projected to pay for itself completely within five years.

The design, which includes 208 high efficiency Winaico panels, consists of six pitched roof systems and one shade structure. The shade structure was custom designed by Moore Energy for the project. Not only will the custom structure provide shade for the kids, but it will also provide power to keep the school cool in the hot summer months. Bill Selig, Owner of Excel Learning Center, said "I think this is a great opportunity for the kids to learn the benefits of solar at a young age. We are very excited for the system start-up." Barry Moore, President of Moore Energy, added "This shade structure was an exciting part of this project. It's great to see the kids benefit from the shade structure while generating energy above."

**About Moore Energy:**

Moore Energy is a premier firm specializing in solar photovoltaic power systems for commercial and residential properties. We are the single source for our customers providing the design, cost/benefit analysis, installation, and system maintenance. Moore Energy is committed to providing our clients with the highest level of service. All of our systems are professionally installed and fully tested by our specially trained installers. For more information, visit [www.MooreEnergy.com](http://www.MooreEnergy.com).
