

PRESS RELEASE

INXITES ACQUIRES EASY95

INXITES STRENGTHENS ITS POSITION AS EUROPEAN MARKET LEADER IN SAP-BASED MANUFACTURING AND TRACEABILITY SOFTWARE

Perk (Steenokkerzeel/Brussels), 2/24/2014 - 12:30

Today Inxites SA signed an agreement for the acquisition of Ninety-Five. Ninety-Five is the company who developed Easy95, a software platform based on the ISA-95 standard. Easy95 offers support to the implementation of manufacturing, serialization and traceability projects.

The acquisition fits in Inxites' strategy to become a global leader in traceability software in the manufacturing and life sciences industry. Easy95 will be added to Inxites' unique product portfolio, the Verifier Suite, and will be marketed under the brand name Veri95.

Earlier this month Inxites has been certified by SAP for its Veri95 solution that enables rapid deployment of SAP MII. Worldwide Inxites is the only player certified by SAP in this area. Veri95 also has become part of the solution Verifier Suite, built on the modules SAP AII, SAP OER and SAP MII.

To further accelerate international growth, 11 new employees were recruited last month. Earlier this year an office was opened in Chicago to support the US activities.
