‘RUN FLAT, RUN FAR’ WITH THE ALL NEW RP SOF SERIES II TIRES

RP SOF Series II High Load 6/8/12-PLY Rated Off-Road Tire

The **RP SOF Series II Tires** are specifically designed and engineered for **heavier payloads, wheel protection,** and **lightweight survivability.** The 6-, 8-, and 12-PLY variants offer their own unique competitive advantage over the competition. Inflated or deflated, rely on the tire specifically constructed to handle your high load requirements.

- **1200+ pound load rating**
- **Run-Flat (mil perf std) capability increases operational survivability**
- **Rated for 50 miles at 40mph devoid of air at an impressive 900lb load**
- **26x9x12 & 26x9x14 Universal Sizes**
- **Type II lightweight 6-ply available**

RP SOF (Special Operations Forces) Series II

High Load 6/8/12-PLY Rated Off-Road Tire

- RP Series II has a harder compound rubber and thicker sidewall than the RP SOF Series.
- NEW added bead-ring protection.
- Its aggressive multi-directional tread and top notch construction make it incredibly versatile in austere conditions.
- A wide contact patch gives it the right amount of traction while reducing driver feedback.
- The reinforced sidewall design provides full protection with its unique wrapped tread design.
- Overall height increased to a true 26x9x12 & 26x9x14 (original RP SOF Series 25.5" height).
- 12-Ply tested and validated to operate at 1200 pounds inflated at 8 psi on RP exclusive tactical beadlock and rated at 900 pounds flat at 50 miles and 40 mph.

- Its lightweight 6-, 8- and 12-ply rating improves acceleration without sacrificing engine output.
- The specially engineered casing gives a stable ride and increased resistance to external penetration.
- 26x9x12 and 26x9x14 universal sizes and aggressive multi-directional tread pattern makes the RP SOF Series II Tactical Tire unique in comparison to the competitors' limited capabilities and reduces the need for mixed vehicle front/rear tire sizes and mixed spares.
- Uniquely suited for operations in areas comprised of ironwood, shale and other harsh obstacles.

The RP SOF tan tire may experience discoloration of the side wall under high temperatures. This discoloration does not compromise the quality of the tire.
