“Faces of Faerie”

App for iPhone, iPad and iPod touch models

Take a journey through the veil to connect to your faery on a very special and first of its kind app that turns your iDevice into a portal. A portal that gives you two distinct choices as to how you'd like to connect with a faery: either by taking a photo of yourself using a window that transforms your image into the faery connecting with you or by allowing the whole of faerie to choose for you by touching the screen and allowing them to directly connect to your energy.

World renowned faery artists, Brian and Wendy Froud, have created an app to help you connect to the faerie realm. Since 2012, Brian has been painting portraits of faeries while Wendy has worked along side of him translating their messages. Brian is now sharing those portraits and allowing you the chance to reach through a portal to experience the faeries he has encountered and to receive a special message from them. These messages are always thought provoking and timely. Only you will truly understand the meaning behind the message.

App Features:

- 48 different connection possibilities to the realm of faery.
- 2 different connection points:
 1. "You Choose" - asks for you to take a photo using your iDevice and you will be connected with your faery.
 2. "Faery Choose" - you touch the portal and your energy is connected to your faery.
- Ability to "Save" your faeries.
- Share your faery by email, message, Facebook and Twitter.
- Unique Autograph Page that allows for you to have your app signed by Brian and Wendy Froud.
- Share your autographs by email, message, Facebook, Twitter and print.
- * Receive notifications of Froud events.
