

- Dedicated to delivering important advances in brain technology
- Unique health and proprietary programs for peak performance
- Affordable and accessible neuroscience technology
- Utilizing multi-modal applications that deliver improved health and performance

Advanced brain training has never been easier than with the innovative technology solutions developed by the Evoke Neuroscience team. As a leader in neuroscience technology, Evoke has made its mark in medical sciences by creating clinical grade technology that is used in doctors' offices nationwide. Evoke develops cutting-edge neuroscience technologies that are accessible and affordable for everybody, from patients to doctors, military and pro-sports athletes. Evoke is for anyone who wishes to learn how to train their brain, whether to cope with stress or other health related issues or simply to reach their personal cognitive and heart fitness peak.

Evoke empowers health and happiness.

- Used by physicians nationwide to improve brain and heart health
- Proven neuroscience technology embedded in wearable consumer devices
- Track and measure brain and heart activity
- Monitor and improve heart rate variability (HRV) with App based technology
- Use with interactive games that work to train cognitive performance

The Revolutionary eVox

Finally...recording to reporting in one system for your medical practice.

Evoke designs and develops devices that simplify data collection and analysis of human physiology. Evoke improves doctor and patient efficiency and experiences, enables easy understanding of complex data and empowers individuals to take control of their overall health and wellbeing.

- Multiple Modalities: brain health (EEG), brain processing speed (ERP), heart health (EKG), emotional health
- Advanced Analysis: cloud-based data uploads and storage, automated processing, easy-to-understand data reporting
- Solutions: Advanced biofeedback
- Results: sharper cognitive responses, stress control, mental and emotional health, peak performance

Empowers Individuals

- Physical evidence of conditions
- Non-medication remedies (portable training systems)
- Measure and track patient success

Easy to Use

- Only fully integrated system available on the market: recording-to-reporting
- Easiest to use hardware and software
- Fastest patient testing, analysis and reporting
- Portable, lightweight, bluetooth

Medical Use

Introducing the Evoke Wave Series

Evoke Neuroscience is excited to present the Evoke WAVE™ and WAVEBAND™, our newest interactive technology that you can use anywhere to track and train brain and heart health and reach your cognitive and physical performance peak.

Train Smarter

The Evoke WAVE™ is a complete brain monitoring and training system. Evoke Neuroscience delivers rock-solid neuroscience technologies into your hands to help relax your state of mind, increase your focus, and improve your cognitive fitness. The Evoke WAVE™ is cool and empowering. The WAVE™ can go anywhere and the WAVE™ is for everyone. Track your progress and witness your brain improve!

The Evoke WAVEBAND™ is an all new workout tool for optimizing your fitness and improving your resilience to everyday stressors. By synchronizing the brain and heart functions, the WAVEBAND™ can help you improve physical and mental performance. Increase your fitness and energy levels or use the WAVEBAND™ while at rest to improve resilience to stress and manage your heart health.

Evoke your potential!
