

Relax Modular Furniture System

Originally launched in Italy Relax from space-pro is now available in North America from www.homedepot.com

Relax is the newest addition to the space-pro range of organizational products. The concept is based around an aluminium pole system which is paired with Canadian manufactured quality MFC components to create a stunning shelving or storage solution.

The Relax innovative modular furniture system offers a wide range of accessories making it ideal for a multitude of applications including walk in closets, reach in closets, dressing rooms, living room storage and home offices.

The posts are manufactured from aluminum which are mounted from floor to wall. The system will provide you with the flexibility to create an integrated storage solution to suit any style in any space. The choice is yours.....

The product range consists of stanchions, brackets, hanger bars, shoe racks, baskets, shelf and drawer units to name but a few.

On The Home Depot website you will find a selection of pre-bundles closet kits to get you started:
