## FoxGuard Launches Next Generation Industrial HMI

FoxGuard Solutions released its **3U Industrial HMI**, a rackmount computer designed to provide flexibility and reliability. This rackmount system is developed specifically for industrial applications in the energy and factory automation markets, as well as other critical infrastructure entities.

FoxGuard's 3U Industrial HMI offers high performance in a small footprint. Tested to meet CE, FCC, and other certifications, this system can be customized to fit a variety of requirements.

### Features of the 3U Industrial HMI

- ▶ High Performance In a Small Footprint
- ▶ Removable Hot-Swap Hard Drives (Max - 4) Optional
- ▶ Dual Video Standard/Quad Video Optional
- ▶ DC Option For Power Input
- ▶ Expansion - (3) PCIe Slots (1 x16, 1 x4, 1 x1) and (4) PCI Slots Standard

The 3U Industrial HMI is available now. More information on the 3U Industrial HMI can be found at <http://www.ccs-inc.com/computer-solutions/products-profile/3u-industrial-hmi>.

### About FoxGuard Solutions

*Having merged with CCS-Inc. in 2014, FoxGuard Solutions provides cyber security solutions, regulatory compliance assistance, and industrial computers for critical infrastructure entities and control system vendors. FoxGuard's key offerings include patch management and validation, legacy OS mitigation, industrial computer solutions, R&D services, engineering services, and field implementation services.*
