about kpi

KPI Partners provides strategic guidance and technology systems for clients wishing to solve their most complex and interesting business challenges involving cloud applications, big data, business intelligence, and data discovery.

A cloud-based reporting and analytics platform specifically built for organizations who use NetSuite.

Overview

KPI Cloud Analytics for NetSuite helps enable companies to gain maximum return from NetSuite ERP information quickly and at a lower cost than with other solutions. Users of KPI Cloud Analytics gain access to dynamic reports and powerful visualizations that are key for companies to drive insightful decision making.

Retail Industry

Retail department managers and executive teams can often spend countless hours in a complex world dominated by spreadsheets and reports that are unique to the retail industry.

With KPI Cloud Analytics for NetSuite, empowered users can measure the effectiveness of in-store promotion, easilty tie together Sales and Inventory overlayed into a single report, and leverage expanded more accurate Costing dashboards to quickly measure margins.

NetSuite ERP applies a per location costing model. This approach is great for manufacturing but does not work well in the retail industry. KPI Cloud Analytics for NetSuite includes behind-the-scenes procedures to re-calculate costing metrics to be specific to the retail industry.

Business Intelligence

KPI Cloud Analytics for NetSuite enables you to manage your retail enterprise with key metrics so you can make timely, fact-based decisions with dashboard analytics ranging from inventory and sales reports, to suppliers, customers and marketing campaign ROI.

All data can be viewed within advanced visualizations featuring key performance indicators (KPIs), graphical report snapshots, trend graphs, and scorecards.

Product Demonstration

If your business could benefit from a modern analytics solution for NetSuite that drives revenue and helps identify opportunities to save on costs, our representatives are available to conduct a personalized demo and consultation.
