

Increasing overall equipment effectiveness with optimized up-time & utilization

In the world of maintenance management, the need to streamline operations when facing the need for maximizing return on assets and cost-cutting initiatives is well known.

The ever changing scenario of global competition and technological advancement pose major challenges and incessant pressure on the maintenance department whose major objective is to provide safe and secure continuous operation at highly demanding levels.

The health of your equipment has considerable impact on the productivity and efficiency of the plant and consequently determines the profitability of the organization. Operational excellence and efficiency is vital in large production facilities and to remain competitive.

Dynamics Maintenance offers your organization an all-in-one solution that gives you real-time information across your business by optimizing your plant's preventive periodic maintenance and internal maintenance requests as well as repairs. At the same time you have direct access to all the data you need regarding equipment, resources and logistics.

BENEFITS

- Ability to manage and track the maintenance of equipment installed in the organization
- Increase up-time of equipment by doing timely maintenance
- Ability to generate preventive and ad-hoc work orders for servicing equipment
- Better maintenance and repair cost containment
- Improve operational performance and efficiency
- Obtain overall control of installed equipment from an operational and financial perspective

about Dynamics

Maintenance, please visit:

dynamics-maintenance.com

Dynamics Maintenance offers a suite of proven solutions and premier services focused on industries such as manufacturing, construction & contractors, process industry, industrial equipment, oil & gas and more.

Products

Maintenance Management

is a very sophisticated solution that gives insight into all types of maintenance. Whether it is scheduled maintenance, breakdowns, projects or internal maintenance requests, a simple work request or a much extended check list, Maintenance Management can handle it.

Mobile Maintenance Management

is based on a mobile platform that enables enterprises to optimize the operations of maintenance personnel through a unique integration of Mobile Workforce Automation and a rich Maintenance Management solution.

Graphical Planning & Scheduling

enables planners to work on multiple screens and drag the orders from the unplanned order overview and drop/allocate them to a resource, machine or human, with capacity on another screen. This product manages the capacity reservations from the production control module, the master planning module, the project management and counting module.

Premier Services

Our services span all phases of your solution life cycle, from analysis and design support, to software implementation, training and post-implementation support.

ABOUT DYNAMICS SOFTWARE

Dynamics Software offers powerful industry-focused solutions integrated in Microsoft Dynamics® AX, CRM, Office 365 and SharePoint; supported by premium services from our highly experienced industry and domain experts. Our solutions are sold, implemented & supported worldwide through our industry experts, premier partners as well as selected Sales and Certified Value Added Resellers.
