FOR IMMEDIATE RELEASE
March 3, 2015

NEW MOBILE EMV SOLUTION FROM ROYAL GATE GROUP

Solving mobile payment problems around the world

San Francisco, CA, March 3, 2015– ROYAL GATE Group has incorporated in California and is bringing the PAYGATE AIR, a mobile, chip credit card (EMV) solution, to market just in time for the October 2015 liability shift. ROYAL GATE has also signed on with POS Portal for distribution of our PAYGATE AIR device in the US.

ROYAL GATE looks forward to delivering a product that makes taking EMV, contact and contactless payments easier when and where customers need them. The partnership with POS Portal will allow ROYAL GATE to get our solution to customers in a timely and reliable fashion.

– Keiji Umemura (CEO - ROYAL GATE)

The PAYGATE AIR is a mobile payment device that connects to a client's phone or tablet (iOS, Android, Windows) via Bluetooth and provides magnetic stripe, chip-card (EMV), and NFC (Apple Pay, etc) support as well as a 1D/2D barcode scanner. The device comes with an API and SDK to help integrate it with existing software systems.

Software vendors (ISV) struggling with the upcoming credit card liability shift (EMV) or who want to offer a fuller featured mobile point of sale device and experience should contact ROYAL GATE.

The multi-function PAYGATE AIR device positions it as a strong competitor in the mobile EMV space. The API and SDK will allow integration with many solutions in the industry. POS Portal looks forward to delivering the device to our customers.

– Shobhit Kumar (Product Marketing at POS Portal)

About ROYAL GATE Group (www.paygatepop.com)
