New Technology Startup Releases Cloud Based Software Solutions to Help Reduce Sepsis Mortality and Control Cost

AcesoCloud, today announced the release of its cloud based analytics and collaboration software solutions for healthcare systems. Physicians, nurses and program administrators will utilize the solution to Improve Sepsis Care Outcome and Reduce Cost of care.

April 9, 2015 (Sunnyvale CA) – AcesoCloud today announced the release of a cloud based solutions to improve sepsis care and outcome, reduce cost of care and help manage sepsis care programs for continuous improvement. AcesoCloud's analytics, collaboration and program management solutions will assist healthcare systems to quickly assess their sepsis programs, plan initiatives, implement care, launch process improvement programs and monitor sepsis projects, leading to reduced mortality and lower cost of care.

"Despite the enormous spending on Sepsis, it continues to have the highest mortality rate and many hospitals may be losing money on this program. Addressing sepsis programs using traditional software and program management tools has limitations, come at a high cost and takes significant time to implement," said Pravat Rout, Co-founder of AcesoCloud. "AcesoCloud's analytics, collaboration and sepsis program management services are delivered on the cloud for physicians, nurses, administrators and operations teams to collaboratively work on their sepsis programs and find improvements quickly."

Sepsis solutions from AcesoCloud include Sepsis Analytics, Sepsis 360 and Sepsis Clock. Sepsis Analytics is the cloud based analytics product that allows healthcare systems to assess the clinical and financial effectiveness of their sepsis programs. It offers in-depth insight, through a multitude of pre-defined financial, clinical and operational dashboards. Sepsis Clock is a mobile care co-ordination solution for physicians, nurses and care administrators. Sepsis 360 is the sepsis program management solution that works together with Sepsis Analytics and Sepsis Clock to bring together all stake holders, processes and resources for a 360 degree view of the entire sepsis program.

AcesoCloud understands the incidence and impact of Sepsis globally and is aware of the challenges faced by Healthcare Systems. To make the program easier to implement, its cloud based solution will let users focus on maximizing performance and stop worrying about systems headaches. The products are ready for use and can be utilized in stand-alone initiatives for assessment and care co-ordination to bring about immediate improvements or as a corporate wide program.

About AcesoCloud

AcesoCloud was formed, by passionate clinical, information technology and industry visionaries, to assist healthcare systems reduce sepsis mortality and cost-of-care. Its analytics, collaboration and program management solutions are designed to assist healthcare systems quickly assess their sepsis programs, plan initiatives, implement care, launch process improvement programs and monitor sepsis projects. Sepsis solutions from AcesoCloud include Sepsis Analytics, Sepsis 360 and Sepsis Clock. The cloud based solution will let users utilize it as stand-alone initiatives for assessment and care co-ordination or as a corporate wide program to realize planned clinical and financial outcomes.
