### Pendulum™ Endorsements

“Lining up in good order and finishing the putt with confidence..... that’s what The Pendulum™ has done for me”

Dan Reeves, Former Head Coach, Atlanta Falcons

“Every so often, an improvement in golf equipment comes along that actually has a basis in utility. Such a product is The Pendulum™ Putter. With the striking force spread significantly across the face, The Pendulum™ is one of the best balanced putters I have come across in my 20 years in the golf industry. Hitting solid putts should no longer be an issue”

Steve McCullough, Golf Performance Specialist, PGA

## Can a small, Georgia based putter manufacturer become successful in today's golf's highly competitive environment?

We believe so and we need your help!

### The Company

Pendulum Golf of Georgia LLC is a Georgia based manufacturer of the Pendulum™ Putter, golf’s most innovative and technologically advanced putter ever introduced to the game of golf. The Pendulum™ Putter is the work of many years of research and development resulting in 2 US patents and a letter from the United States Golf Association (USGA) stating that it conforms to the Rules of Golf as established by the USGA and The Royal & Ancient Golf Club of St. Andrews for worldwide tournament play by professional and amateur players alike.

### Our Story

The Pendulum™ Putter was developed following several years of research and design by a father son team, Bob and Bo Chambers. Bo, a decorated army veteran was involved in the rescue of American students in Grenada and did not start playing golf until his late twenties. He got the idea for the Pendulum™ Putter from a vacuum cleaner after he noticed the effortless way it worked and thought if he turned it sideways he could create a putter that could dramatically improve his game. He sketched a rough design on a napkin and took it to Bob who built the first prototype from spare parts bought at Home Depot and one of Bo’s old putters to come up with a rough prototype. Although it didn’t look ready for prime time, it worked!

Bob was just the man to develop the Pendulum™ Putter, having received an early introduction to engineering and design from his dad who worked at Oak Ridge Tennessee and Bell Bomber (designer of the B-29 aircraft) during WWII. In 1972, he formed a company to build machinery for the paper industry and was instrumental in the design and manufacturer of an automated timber harvester. He formed PHA South in 1989 and has designed and developed many automation projects for the textiles, pharmaceuticals, medical, aircraft, and automotive clients.

# Pendulum Golf of Georgia Introduces The Pendulum™ Putter

## Conforms to USGA

### Rules

The Pendulum™ Putter conforms to the United States Golf Association (USGA) rules for tournament play worldwide by professional and amateur players

## Patented Putter Design

Design Patent USD 460 136S: 32 Utility Patents US 6 554 720 B1.

## Made in the USA

The only professionally designed and patented putter made in the USA

## Product Specifications

Loft -1°  
Lie Angle 74°  
Shaft Length 34"  
Grand Tour Grip  
Head Weight 340 grams  
Stainless 431 Steel Casting
