

LANGUAGE TRANSLATIONS FOR PATIENT OUTREACH

MEDICAL EXPERTISE

Not all translators are the same. Our team of translators are MDs, RNs, PharmDs and other experienced and qualified professional linguists who understand the science behind the language. With over two decades in the life sciences industry, you can be sure that the best possible team is working on your project.

PATIENT COMMUNICATIONS

Translating for patients is a specialized skill and our team of translators understands the issues of culture, literacy and reading levels. We even have a dedicated US Spanish team that works on creating a level of Spanish applicable to all the different types of Spanish speakers in the US.

your partner
for success

FULL SERVICE PARTNER

We can work in any language and we have our own foreign language design studio that allows us to create multilingual versions of any of your patient education documents, websites or presentations. We also provide interpreters and language training as needed.
