

# PATIENT TESTIMONIALS

## PDA-HAF INJECTIONS

"The PDA-Human Amniotic Fluid injection worked great in relieving my constant knee pain due to osteoarthritis. Since receiving the injection in both knees, I no longer need a walker or cane all the time. In fact, I often forget to use either now that the constant pain in my knees is gone. I can walk with confidence and purpose thanks to PDA."

- ▶ Age: 75
- ▶ Diagnosis: Osteoarthritis
- ▶ Treatment: 1cc injection per knee

"The PDA-Human Amniotic Fluid Injection is a great treatment option for relieving chronic pain without having to endure the undesirable downtime and cost of surgery."

- ▶ Age: 64
- ▶ Diagnosis: Arthritis
- ▶ Treatment: 1cc injection in outer knee

"I went from taking 2 pain pills a day to 2 pain pills every 3 or 4 days after my second injection."

- ▶ Age: 55
- ▶ Diagnosis: Bone on Bone Facets
- ▶ Treatment: (2) 1cc injection in all four facets, 8 weeks between treatments

"Administration of the PDA-Human Amniotic Fluid Injection is fast, easy, and painless. The procedure was done in a matter of minutes, and even up to 10 minutes following the injection, I did not feel any soreness or pain at the injection site."

- ▶ Age: 51
- ▶ Diagnosis: Chronic Knee Pain
- ▶ Treatment: 1cc injection in left knee

The number of PDA-HAF injections needed depends on the type and severity of your injury. Most frequently, patients have two injections within a six month period.
