FasTrackKids® Expands in Texas

New FasTrackKids Enrichment Center opens in Texas

GREENWOOD VILLAGE, CO., April 7, 2016 -- FasTrackKids, a world leader in early childhood enrichment programs, opened a new center in the Southwest. The children and families in College Station Texas now have access to our world-renowned programs through our first Enrichment Center in College Station.

Dr. Jennifer Hurd is the owner of the College Station location and brings years of experience from the corporate training world to her new business. "FasTrackKids creates a unique learning environment for children to learn actively while having fun. We were drawn to this type of a learning atmosphere because it fits our teaching style. We can help children reinforce their learning style preferences while strengthening their least dominant styles. This very positive approach to teaching children builds their confidence with every lesson. FasTrackKids' innovative approach to teaching children is truly the wave of the future," said Dr. Hurd.

FasTrackKids students in the FasTrack Fundamentals program will be exposed to traditional subjects, such as biology and art along with non-traditional subjects, such as economics and communication. Many other programs are offered including baby sign language and FasTrack Explorers.

For more information, please contact Dr. Jennifer Hurd at jennifer.hurd@jasdventures.com

PRESS RELEASE

About FasTrackKids International – With more than 240 locations open or in development in over 50 countries, FasTrackKids is a world leader in early childhood education. Since 1998, our FasTrackKids® programs in centers and schools around the world have been providing children unique educational experiences to thrive in the 21st century. We created FasTrackKids programs because we believe there is a way to teach children *differently* by engaging them in the way they learn *naturally*. We focus on young learners because early childhood is the most critical time period in a child’s life to develop their learning and thinking skills as well as building their emotional and social intelligence. All children deserve the opportunity to develop *their* potential for a successful future. For more information, please visit www.fastrackkids.com.
