Electrovaya to deploy INDUSTRIOS ERP to gain visibility over operations

Oakville, Ontario, May 18 2016 – INDUSTRIOS Software, Inc., developer of the INDUSTRIOS ERP Manufacturing Suite, announced today its recent agreement with Electrovaya (TSX:EFL) to deploy INDUSTRIOS ERP at its Mississauga location.

The decision to select INDUSTRIOS was driven by Electrovaya’s need to partner with a software publisher that is focused entirely relative to its type of unique and robust business environment. This gives Electrovaya access to the INDUSTRIOS team to provide software implementation expertise as well as manufacturing best practices consulting. “Going beyond software implementation into the realm of best practices consulting is what sets us apart, and is at the core of our InvisibleFactory program”, says Eva DeGasperis, Principal and Senior Vice President, Professional Services and Practices at INDUSTRIOS Software.

Electrovaya’s recent growth is highlighting the need for increased visibility over operations. The implementation of INDUSTRIOS ERP is expected to help Electrovaya continue to scale its business growth, improve customer service dynamics, and drive non value costs out of the entire supply chain.

About Electrovaya Inc.

Electrovaya Inc. (TSX:EFL) designs, develops and manufactures proprietary Lithium Ion Super Polymer® batteries, battery systems, and battery-related products for energy storage, clean electric transportation and other specialized applications. Electrovaya, through its fully owned subsidiary, Litarion GmbH, also produces cells, electrodes and SEPARION™ ceramic separators and has manufacturing capacity of about 500MWh/annum. Electrovaya is a technology focused company with extensive IP. Headquartered in Ontario, Canada, Electrovaya has production facilities in Canada and Germany with customers around the globe.

INDUSTRIOS ERP can be run as a standalone, and also has proven integrations to many financial software packages. INDUSTRIOS ERP is complemented by PlantGauge™, a Manufacturing Intelligence Dashboard designed for advanced data visualizations and actionable graphical displays of Key Performance Indicators (KPIs). PlantGauge is also one of the tools that supports the delivery of the INDUSTRIOS Invisible Factory, a program aimed at restoring executive focus on innovation and business development.
