BODY WORN CAMERAS: A NEW CHALLENGE

Body Worn Cameras generate a huge amount video day after day. Moving all that video from the cameras to the computer and filing it away properly can be extremely challenging and labor intensive. How do you process thousands of video files daily?

- **Proven Technology**

The product line has proven itself.... Since 1998

- **Standardization is Everything**

The Locker is an integral part of the Digital Evidence Manager® system. DEM is THE standard for storing Body Worn Camera Video. The majority of top BWC brands including **VIEVU, Wolfcom, MAXSUR, Reckon-X** and many others have partnered up with us to use DEM for Body Worn Camera Videos.

- **Dock and Walk™**

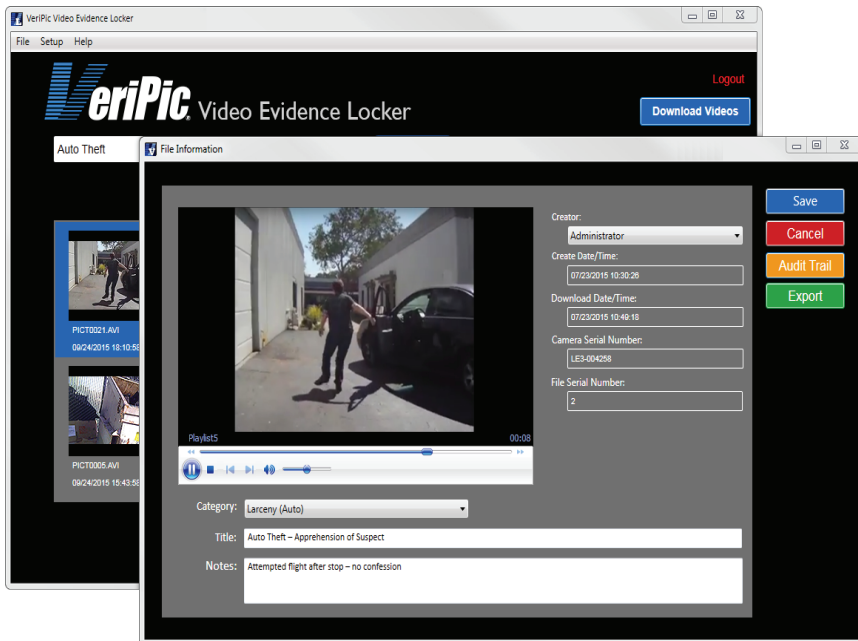

The Video Evidence Locker automatically detects that a Body Worn Camera is being recharged and pulls all the video off the camera while it's being recharged. The officer just Docks their camera and can go home. The camera's memory is cleaned afterwards making the camera completely ready for use the next morning.

- **Video Retention**

Set different retention periods for different types of incidents. Retention periods are totally customizable. Video is retained for the required period based on your criteria.

Video Evidence Locker™

Storing Data Generated by Body Worn Cameras

- **Document Your Video**

Attach titles and notes to your video as documentation.

- **Search and View**

Easily search for videos using words, dates, officer — using an interface similar to internet search engines.

- **Ease of Use**

Most users are functional with less than 30 minutes of training.

- **Audit Trail and Chain of Custody**

The Audit Trail tracks all user interactions associated with the Video File.

- **Access Control**

Users and their supervisors can view their videos but access is prevented for other users. Accidental videos that have no evidentiary value can be optionally marked as “private” to protect the privacy of the officer involved.

- **Transfer to Digital Evidence Manager®**

Approximately 3% of Body Worn Video becomes part of a case or lawsuit. Video Locker seamlessly transfers these videos to the VeriPic® Digital Evidence Manager® for permanent storage as evidence video, exempt from retention policy sweep out with all the benefits offered by DEM. Digital Evidence Manager® includes Military Strength Encryption, eDiscovery, Group Access, Evidence Management including all other types of evidence such as still photos, audio files, scanned documents, etc.

LOCKER IS THE AUTOMATED FRONT END FOR VIDEO DOWNLOAD
