

## **SurvivalTravel.com – The Youth Social Travel Mobile Solution Is Launched To Take On The World.**

23 September 2016

**Kuala Lumpur, MY** – SurvivalTravel.com, a brand new mobile and web travel solution has been officially launched at KL Converge 2016. It comprises of 3 major mobile apps and web – SurvivalTravel, SurvivalLanguage and SurvivalKit.

SurvivalTravel itself is the first in the world photo sharing app with a cascading rating and trending solution system with an interesting design to the interface. SurvivalLanguage is the first in the world crowdsourcing app for language translation using audio recordings and offline storage. SurvivalKit is the adventure app that includes treasure hunt challenges and trip recording. They are build separately but to coexist as a larger SurvivalTravel travel solution ecosystem.

An opensource photoeditor SDK for iOS and Android is also part of the SurvivalTravel offerings for developers.

“SurvivalTravel is a unique disruptive technology in the highly competitive global travel market space. Travel itself is very youthful and mobile. Social, sharing, language and adventure make travel all that worthwhile and fulfilling. In addition to also protect our technology, we have filed patents to protect our inventions globally. “ says Firdaus, founder.

The solution is targeted to youth and the avid travellers segment that are inclined to travel mobility. SurvivalTravel, SurvivalLanguage and SurvivalKit is available in Apple AppStore and Google Playstore.

The project was undertaken by Megasap Sdn Bhd with financial support by MCMC. Megasap Sdn Bhd is also the finalist for the National Intellectual Property Award 2016 for the organization category.
