

SAN Fernando Valley, CA – LGI Technology proudly announces the launch of the all New MagnaLED Retrofit kit.

The MagnaLED is the latest additions to the Los Angeles-based, commercial-grade LED manufacturer's LED retrofit line up.

The MagnaLED is designed to retrofit troffers by removing the tubes, disconnecting the ballast and adding the LED strips. The magnetic strip and driver makes this product very easy to install. We have released a full instructional video on youtube for more details.

“This is a DIY product and no tools are needed to retrofit your fixture” Product Manager Rob Setian said. “Our main focus when designing this kit was to keep it simple and I believe we were able to achieve our goal”.

Available in 4000K or 5000K, 2-foot or 4-foot version. ETL certified and DLC listed including a 5-year warranty.

More details and product data sheet are available at [www.lgitek.com/](http://www.lgitek.com/)

For more information on where to purchase the products or to become a distributor, please contact LGI Technology at: [info@lgitek.com](mailto:info@lgitek.com) or (877) 221-8182.
