

# You Print. We Manage.

Optimize your office print environment  
with Printix in concert with Microsoft Azure Active Directory.

Microsoft Azure, and other cloud computing platforms, allows businesses to be more efficient, and printing should be one of those business processes, maybe even the most basic business process that could be simplified with the cloud.

The main benefit of a cloud-based print solution like Printix, is that it drastically simplifies your print infrastructure, and smooths the administrative complexities involved in managing diverse hardware, software, computer operating systems and vendor-specific printer requirements.

**Sign in with Microsoft**

Azure and Office 365 users

Printix is integrated with Azure Active Directory to manage user access and enable single sign-on with Printix. Now users can implement a true cloud-based workplace using Office 365.

Moving local print management to a cloud-based solution reduces infrastructure costs significantly in comparison to current platforms.

Printix allows IT administrators to manage services rather than servers and lets users print reliably, instead of having to deal with printing problems. Adopting a cloud strategy for print saves time and money, allows IT resources to focus on value-add activities and improves productivity as well as job satisfaction.

## Serverless architecture

Automate print infrastructure tasks and eliminate print servers.

## Follow Me | Pull Print

Confidential printing from any device to any network printer.

## Single sign-on with Azure AD

Single sign-on and access to Printix using Microsoft Azure Active Directory.

## Improve Productivity

Easy to use and quick to deploy. Automatic updates and self-service provisioning.

## Visibility & Insight

Get intelligent and actionable recommendations to reduce your costs.

## Pay as you go

Only pay for users that print on a monthly subscription basis.

[Try Printix FREE for 30 days!](#)

No setup fees, no credit card information required!  
No long-term contracts (simply month to month).
